NB Private Equity Partners Announcement of Long Term Dividend Policy and Declaration of Initial Dividend 22 January 2013

Financial Information as of 31 December 2012

Dividend Payment

NBPE has declared the first semi-annual dividend payment on its class A ordinary shares ("Shares") as part of the implementation of a long-term policy of paying regular dividends

- The Board of Directors of NBPE has declared a semi-annual dividend payment of \$0.20 to be paid on each Ordinary Share on 28 February 2013
 - On an annualized basis, this dividend payment represents a dividend yield of 3.5% based on the estimated December 2012
 NAV and 4.8% based on the Euronext closing price of \$8.27 on 21 January 2013
- Under the long-term dividend policy, NBPE intends to pay regular, semi-annual dividends to its shareholders
 - Over time, NBPE intends to pay this dividend from the cash yield it receives from its direct yielding investments
 - NBPE also intends to continue to grow its Net Asset Value per Share through appreciation of its direct co-investments and fund investments

Investment Strategy and Dividends

NBPE intends to continue its strategy of increasing its allocation to direct yielding investments and direct co-investments

- NBPE has been successfully executing on its previously announced strategy of increasing its percentage of direct yielding investments and direct co-investments, while reducing its exposure to private equity funds
 - Currently, on a pro forma basis, all direct investments total \$224.2 million, or 40% of NAV, including yielding investments of \$101.8 million, or 18% of NAV
 - NBPE expects its portfolio will be a majority of direct investments before the end of 2013. This is expected to include investing at least \$100 million in additional direct yielding investments, subject to finding suitable opportunities and market conditions
- NBPE's dividend is currently approximately 50% covered by the run rate current cash yield on its direct yielding portfolio, and is fully covered by 2012 estimated net increase in net assets
 - NBPE estimates that, through the investment plan described above, dividends at the current level will be fully covered by the cash yield on its direct yielding investments by the end of 2013
 - As of 31 December 2013, NBPE's cash balance was \$65.3 million on a pro forma basis¹
- The aggregate dividend amount for the Company on an annualized basis would total \$19.5 million, based on the amount of the initial dividend. This compares with the following potential income from NBPE's direct yielding portfolio, at various investment levels and yields:
 Direct Yielding Portfolio Income

On a pro forma basis, NBPE's direct yielding portfolio has a fair value of \$101.8 million and generates a 10.0% cash yield²

On a pro forma basis, NBPE's direct yielding portfolio has a fair value of \$101.8 million and generates an 11.8% total yield²

Note: As of 31 December 2012 (unaudited, pro forma). Data is pro forma for distributions from the NB Alternatives Direct Co-investment Program received in January 2013, NBPE's participation in the primary issuance of second lien debt in a direct yielding investment in January 2013, and NBPE's approval of an additional purchase of this second lien debt through a secondary transaction. See endnote three for important information related to the dividend.

NBPE's actual cash balance was \$67.4 million as of 31 December 2012.

^{2.} Two mezzanine debt investments include equity investments completed as part of the mezzanine transaction, and two senior secured term loans include warrants acquired during the loan issuance. The fair value stated above includes the value of these equity investments and warrants, but the cash and total yields are calculated based on the fair value of only the debt investments.

Future Dividend Payments

NBPE intends to implement its long-term dividend policy by continuing to make semi-annual dividend payments

- NBPE's Board of Directors will continue to evaluate the Company's financial position, annual dividend target and the timing of future dividends
 - Future dividend payments will be announced by NBPE after the Board of Directors has completed such evaluation
 - All dividends shall be made conditional on the passing of the solvency test under Guernsey law
- This long-term dividend policy is a continuation of the Capital Return Policy NBPE instituted in 2010 pursuant to which the Company stated that it would return to shareholders at least 50% of the realized net increase in NAV attributable to its **Ordinary Shares**
 - NBPE will also continue to retain the flexibility to repurchase Shares through its Share Buy-Back Programme

Investment Strategy

Actively pursuing direct co-investments and direct yielding investments

- Our intention is that new investments will be predominantly equity co-investments or direct yielding investments
 - Equity co-investments: equity investments alongside premier private equity sponsors in their core areas of expertise
 - Direct yielding investments: debt generating strong cash yields and in many cases additional upside through PIK and / or equity
- NB Alternatives expects that direct investments will comprise a majority of NAV before the end of 2013
- We expect this strategy to reduce the expected duration of our private equity portfolio, increase transparency for shareholders and reduce our overall expense ratio

DIRECT INVESTMENTS: INCREASINGLY SIGNIFICANT¹

Note: As of 31 December 2012 (unaudited, pro forma). Data is pro forma for NBPE's participation in the primary issuance of second lien debt in a direct yielding investment in January 2013 and NBPE's approval of an additional purchase of this second lien debt through a secondary transaction.
