1. Revenue & EBITDA Growth: Past performance is no guarantee of future results. Fair value as of 30 June 2024. Growth rate data includes both organic growth and growth from M&A transactions in the portfolio. The data is subject to the following adjustments: 1) Excludes public companies, Marquee Brands and other investments not valued on multiples of EBITDA. 2) Analysis based on 58 private companies. 3) The private companies included in the data represent approximately 83% of the total direct equity portfolio by NAV. 4) The following exclusions to the data were made: a) EBITDA growth of one company (approximately 2% of value) was excluded from the data as the Manager believed the EBITDA growth rate was an outlier due to an extraordinary high percentage change b) one company (<1% of direct equity fair value) was excluded due to noncomparable periods of revenue and/or EBITDA c) five companies (5% of direct equity fair value) were held less than one year and excluded from the portfolio company operating metrics data due to noncomparable periods of revenue and/or EBITDA prior to private equity ownership. Where necessary, estimates were used, which include pro forma adjusted EBITDA and other EBITDA adjustments, pro forma revenue adjustments, run-rate adjustments for acquisitions, and annualised quarterly operating metrics. Portfolio company operating metrics are based on the most recently available (unaudited) financial information for each company and are as reported by the lead private equity sponsor to the Manager as of 23 September 2024, with LTM periods as of 30/6/24 and 31/3/24 and 30/6/23 and 31/3/23. LTM revenue and LTM EBITDA growth rates are weighted by fair value. Growth rate data is based on 58 companies where NB could calculate a growth rate and subject to the aforementioned exclusions; underlying EBITDA reported by the GPs may include pro forma or other adjustments to LTM EBITDA in one or both periods and this reported EBITDA used to calculate growth rates may not be the same EBITDA for valuation purposes by underlying GPs. As a result, growth and valuation multiple data are not directly comparable.

Following a record exit year in 2021, exit activity slowed in 2022-2023. IPO exit routes were largely closed and follow on activity very limited. Strategics and PE also retrenched. Minority stake sales and GP-led secondaries became more prevalent. Market activity has improved since the beginning of 2024, with improved outlook for near-term exits

Attractive Co-Investment Market Environment

We believe NB Co-Investment is well-positioned to deploy capital in the current market

Increasing Need for Private Equity Financing

- Tighter debt markets; new deals requiring more equity
- Difficulty (and delay) in overall fundraising for private equity firms
- GPs less willing to rely on post-deal syndications
- Platforms that make meaningful primary commitments continue to have priority

Increasing Co-Investment Deal Flow

- Less experienced co-investors stepped back in volatile environment
- Certain co-investors became capital constrained and/or impacted by valuation volatility
- NB Private Markets co-investment deal flow increased to ~11 deals per week in 2023 and YTD 2024 (versus ~8 deals per week over the prior three calendar years)¹
- Ability to allocate tactically

Strong Environment For Mid-Life Opportunities

- Exit options have been more limited in recent years: IPOs nearly frozen, SPACs not available, corporate strategics and PE investors pulled back
- Minority sale allows GPs to maintain existing attractive debt capital structure
- Attractive time for potential add-on acquisitions

Appendix – UN Sustainable Development Goals (UN SDGs) Thematic Alignment of Investments

UN Sustainable Development Goals (UN SDGs) Thematic Alignment of Investments. The Manager acknowledges that companies may have a range of effects on employees, the community and the environment through their operations and products and services. The Manager believes that companies that exhibit leadership in managing material environmental, social, and governance considerations, are also often more resilient, competitively positioned, and may have lower risk profiles. Furthermore, the Manager believes that companies which can be considered as thematically aligned with addressing social and environmental challenges are by their nature, essential and that these business models may benefit from macroeconomic and demographic trends while also contributing meaningfully to addressing global social and environmental challenges, such as outlined by the United Nations Sustainable Development Goals (“UN SDGs”).

The Manager evaluates UN SDGs Thematic Alignment as follows:

- No potential UN SDGs thematic alignment: Companies whose operations or products/services may potentially conflict with the advancement of positive outcomes for people or the environment, such as outlined by the themes of the UN SDGs;
- Neutral potential UN SDGs thematic alignment: Companies that have a mixed or unknown benefit to people or the environment, such as outlined by the themes of the UN SDGs;
- Potential moderate UN SDGs thematic alignment: Companies that have an overall positive benefit to people or the environment, such as outlined by the themes of the UN SDGs;
- Potential high UN SDGs thematic alignment: Companies whose products or services offer solutions to long-term social and environmental challenges such as those outlined by the UN SDGs in addition to additional social or environmental dimensions as defined by the Impact Management Project.

The Manager strives to identify and invest in companies that it deems to have thematic alignment with the UN SDGs, where deemed financially beneficial to do so, while seeking to avoid exposure to companies that have known ESG-related controversies or business models it deems have no potential UN SDGs thematic alignment or that are otherwise inconsistent with the Manager's Responsible Investment Policy, as the Manager believes such exposure would otherwise present material risks to the future value of an investment.

Awards Disclosures

The Asset Management Awards are designed to recognize outstanding achievement in the UK/European institutional and retail asset management spaces. The Asset Management Awards' judging is undertaken by a group of judges with expertise across the UK/European institutional and retail asset management spaces. Each judge reviews submitted entry material and then scores the entries out of a total of score of 10 providing their reasoning as to why they have submitted that score. Two judges analyze each category and the firm with the highest overall score wins that category. Votes are verified by Insurance Asset Management's editorial team. The award does not constitute an investment recommendation. NB Private Equity did not pay a fee to participate. Awards and ratings referenced do not reflect the experiences of any Neuberger Berman client and readers should not view such information as representative of any particular client's experience or assume that they will have a similar investment experience as any previous or existing client. Awards and ratings are not indicative of the past or future performance of any Neuberger Berman product or service.

European Pensions, a leading publication for pension funds across Europe, launched these awards to give recognition to and honor the investment firms, consultancies and pension providers across Europe that have set the professional standards in order to best service European pension funds over the past year. Judging is undertaken by a group of judges with expertise across the European pension fund space. Each judge reviews submitted entry material and then scores the entries out of a total of score of 10 providing their reasoning as to why they have submitted that score. Two judges analyze each category and the firm with the highest overall score wins that category. Votes are verified by the European Pensions' editorial team. Private Equity Wire, a specialist industry publication in Europe launched these awards to showcase excellence among industry participants. The publication partnered with Bloomberg to create a clearly defined methodology for selecting the award winners. Shortlists were created by Bloomberg from a fund manager universe including all funds managed by European-domiciled GPs with a minimum fund size of \$100 million. Asset band grouping thresholds were based on individual fund sizes – not overall GP assets under management in a category. Funds were grouped according to category and vintages from 2013 to 2018 and ranked on the basis of their net IRR. GPs with more than one fund ranked among the top performers across multiple vintages within any category were shortlisted. Winners from each category were then decided by majority vote from the publication's readers. The award does not constitute an investment recommendation. NB Private Equity did not pay a fee to participate. Awards and ratings referenced do not reflect the experiences of any Neuberger Berman client and readers should not view such information as representative of any particular client's experience or assume that they will have a similar investment experience as any previous or existing client. Awards and ratings are not indicative of the past or future performance of any Neuberger Berman product or service.

Endnotes

1. As of 30 September 2024. Includes full and partial exits, including sales of public stock, based on the value of the investment or prior share price attributable to the realized proceeds, three quarters prior to an announced exit. Proceeds include funds that are currently in escrow but are expected to be received. Returns are presented on a "gross" basis (i.e. they do not reflect the management fees, carried interest, transaction costs and other expenses that may be paid by investors, which may be significant and may lower returns).
2. The MSCI World Index captures large and mid-cap representation across 23 Developed Markets (DM) countries*. With 1,429 constituents, the index covers approximately 85% of the free float-adjusted market capitalisation in each country (MSCI World Factsheet, 30 September 2024, the latest available). The benchmark performance is presented for illustrative purposes only to show general trends in the market for the relevant periods shown. The investment objectives and strategies in the benchmark may be different than the investment objectives and strategies of NBPE and may have different risk and reward profiles. A variety of factors may cause this comparison to be an inaccurate benchmark for any particular fund and the benchmarks do not necessarily represent the actual investment strategy of a fund. It should not be assumed that any correlations to the benchmark based on historical returns would persist in the future. Indexes are unmanaged and are not available for direct investment. Investing entails risks, including possible loss of principal. Past performance is no guarantee of future results.
3. Valuation & Leverage: Past performance is no guarantee of future results. Fair value as of 30 June 2024 and subject to the following adjustments. 1) Excludes public companies, Marquee Brands and other investments not valued on a multiple of EBITDA. 2) Based on 57 private companies which are valued based on EV/EBITDA metrics. 3) The private companies included in the data represents 80% of direct equity investment fair value. 4) Companies not valued on multiples of EBITDA (billings, revenue or other valuation metrics) are excluded from valuation statistics. 5) Leverage statistics exclude companies with net cash position and leverage data represents 80% of direct equity investment fair value. Portfolio company operating metrics are based on the most recently available (unaudited) financial information for each company and are as reported by the lead private equity sponsor to the Manager as of 23 September 2024, based on reporting periods as of 30 June 2024 and 31 March 2024. EV and leverage data is weighted by fair value. LTM EBITDA used by underlying GPs for valuation purposes may differ from EBITDA used to calculate growth rates due to pro forma or other adjustments and therefore the two data sets are not directly comparable.
4. Revenue & EBITDA Growth: Past performance is no guarantee of future results. Fair value as of 30 June 2024. Growth rate data includes both organic growth and growth from M&A transactions in the portfolio. The data is subject to the following adjustments: 1) Excludes public companies, Marquee Brands and other investments not valued on multiples of EBITDA. 2) Analysis based on 58 private companies. 3) The private companies included in the data represent approximately 83% of the total direct equity portfolio by NAV. 4) The following exclusions to the data were made: a) EBITDA growth of one company (approximately 2% of value) was excluded from the data as the Manager believed the EBITDA growth rate was an outlier due to an extraordinary high percentage change b) one company (<1% of direct equity fair value) was excluded due to noncomparable periods of revenue and/or EBITDA c) five companies (5% of direct equity fair value) were held less than one year and excluded from the portfolio company operating metrics data due to noncomparable periods of revenue and/or EBITDA prior to private equity ownership. Where necessary, estimates were used, which include pro forma adjusted EBITDA and other EBITDA adjustments, pro forma revenue adjustments, run-rate adjustments for acquisitions, and annualised quarterly operating metrics. Portfolio company operating metrics are based on the most recently available (unaudited) financial information for each company and are as reported by the lead private equity sponsor to the Manager as of 23 September 2024, with LTM periods as of 30/6/24 and 31/3/24 and 30/6/23 and 31/3/23. LTM revenue and LTM EBITDA growth rates are weighted by fair value. Growth rate data is based on 58 companies where NB could calculate a growth rate and subject to the aforementioned exclusions; underlying EBITDA reported by the GPs may include pro forma or other adjustments to LTM EBITDA in one or both periods and this reported EBITDA used to calculate growth rates may not be the same EBITDA for valuation purposes by underlying GPs. As a result, growth and valuation multiple data are not directly comparable.
5. The FTSE All-Share Index represents the performance of all eligible companies listed on the London Stock Exchange's (LSE) main market, which pass screening for size and liquidity. The index captures 98% of the UK's market capitalisation (FTSE All Share Factsheet, 30 September 2024, the latest data available). The benchmark performance is presented for illustrative purposes only to show general trends in the market for the relevant periods shown. The investment objectives and strategies in the benchmark may be different than the investment objectives and strategies of NBPE and may have different risk and reward profiles. A variety of factors may cause this comparison to be an inaccurate benchmark for any particular fund and the benchmarks do not necessarily represent the actual investment strategy of a fund. It should not be assumed that any correlations to the benchmark based on historical returns would persist in the future. Indexes are unmanaged and are not available for direct investment. Investing entails risks, including possible loss of principal. Past performance is no guarantee of future results.

Important Performance Information Endnotes – Co-Investments

Note: Past performance is not necessarily indicative of future results. Performance includes data since April 1, 2009 – September 30, 2024. NB Alternatives Advisers LLC (“NBAA”, “Investment Manager” or “Adviser”) is the investment manager for Neuberger Berman’s private equity practice (“NB Private Equity”). Track record reflects includes private equity investments (“Private Equity Investments”) made in funds managed by the Private Investment Portfolios and Co-Investment Investment Committee (“PICO Funds”). “Private Equity Investments” excludes (i) credit- or debt-like investments that were structured with an expected return profile similar to a debt security and (ii) real assets investments including energy, real estate, power utilities and infrastructure that were not expected to have a private equity-like return profile at the time it was underwritten. The PICO track record includes accounts for which investments are sourced and due diligenced by NB Private Markets and the investor may exercise final investment discretion. A full schedule of investments is available upon request. PICO Funds includes funds managed by NB Alternatives and its predecessors-in-interest. Neuberger Berman and its affiliates are the successor to all of the predecessors’ operational assets, and employ substantially all of their key personnel, and NB Alternatives became either the advisor or sub-advisor to the fund accounts previously advised by the predecessors. Gross data is net of underlying investment fees, expenses, and carried interest but gross of NB fees, expenses, and carried interest and net data is net of underlying investment fees, expenses, and carried interest and net of NB fees, expenses, and carried interest. Please note that most custom account funds generally do not use credit facilities. Returns are unaudited. In reviewing the performance information, please keep in mind the inherent limitations of the reliability of certain of the valuations upon which that performance presentation is made. The results are provided for hypothetical and illustrative purposes only, are subject to a number of significant assumptions and are not intended to predict the performance of any specific investment. Similarly, there can be no assurance that future investments within the strategy will achieve, or be able to achieve, comparable results. No representation or warranty is made as to the reasonableness of the assumptions made or that all assumptions used in achieving the returns have been stated or fully considered. A full Schedule of Investments is available upon request.

The composite performance reflects the combined performance of all Private Equity co-investments made by the PICO Funds and does not reflect the actual performance of any individual investor, or account managed or advised by Neuberger Berman and is therefore deemed to be hypothetical and for illustrative purposes only, is subject to a number of significant assumptions (as described below) and is not intended to predict the future performance of any Neuberger Berman fund or any specific investment. This hypothetical performance was not made in the context of a single fund as part of a single investment program with coordinated investment objectives, guidelines and restrictions. Accordingly, it should not be assumed that the investments made by any such fund will have the same characteristics or returns as presented herein. Hypothetical returns have inherent limitations, and prospective investors should not rely on any hypothetical performance shown herein. Similarly, there can be no assurance that any Neuberger fund will achieve, or be able to achieve, comparable results. No representation or warranty is made as to the reasonableness of the assumptions made or that all assumptions used in achieving the returns have been stated or fully considered. Changes in the assumptions would likely have a material impact on the hypothetical returns.

Composite Net Return Calculation Methodology: The information provided herein includes all co-investments originated by and completed in the NB Private Equity platform managed by the PICO Investment Committee during Q2 2009 – Q1 2024 with exceptions as outlined above. As governing documents and applicable fee structures differ for each commingled fund and dedicated client account, it is not feasible to appropriately allocate fees, expenses and carried interest in a perfectly consistent manner and obtain an accurate aggregate net return from the actual returns presented on a “gross basis”. Notwithstanding the above, we have conducted an analysis, presented herein, with the goal of simulating “synthetic net returns” based on certain assumptions applied across actual gross cash flows, as detailed below.

The Composite Net Return data is calculated by modeling the effect of layering in the fees, expenses and carried interest of NB Alternatives Advisers LLC in the manner described below over the investment valuations. In determining the fair value of the investments, NB Alternatives Advisers LLC applies the guidance of ASC 820 (formerly known as Financial Accounting Standard 157), which requires investments to be reported at fair value. Each vintage year is a “Fund” with the fund size (“total commitments”) being total invested capital for that vintage year as of 9/30/2024. Fees are charged as follows (i) 125 bps on total commitments for the first four years of the fund life; and (ii) 125 bps on net invested capital (“cost basis”) for the remainder of the fund life. The cost basis is estimated by reducing the cumulative invested capital by cumulative distributions to date, scaled by the investments’ 9/30/2024 multiple of invested capital, or the investment’s final multiple of invested capital. For example, a \$20 million investment that has returned \$15 million and has a remaining \$15 million in value (1.5x total multiple) will be held at a cost basis of: $\$20 - \$15 \times (\$20/\$30) = \$10$ million. Carry is accrued on a deal-by-deal basis, assuming a 12.5% carried interest, subject to an 8% preferred return including a 100% GP Catch-up. The Net IRR is calculated based on the timing of actual investment cash flows and, as such, Net performance is not impacted by the use of a subscription facility. Expenses of 20 bps are charged on committed capital for the assumed life of the fund. Any performance or related information presented has not been adjusted to reflect the impact of any additional fees paid to a placement agent by an investor, if any, or any reduced fee rates applicable to certain investors with aggregate commitments equal to or greater than \$10 million, which would result in a substantial reduction or increase, as applicable, in the returns if such fees or reduced fee rates were incorporated. A composite net return calculation is used in lieu of actual net returns given that actual net returns are impossible to calculate because fees and expenses are applied on a fund-wide basis and the investments in this composite calculation were made through different fund vehicles using different rates.

Realised and partially Realised investments are defined as investments with no remaining NAV or a DPI larger than 100% (DPI = distributed capital / paid-in capital). The Composite Realised Net IRR is calculated using the same terms and methodology noted above with each “Fund” consisting of Realised investments within that vintage year. The fund size (“total commitments”) is defined as total invested capital for that vintage year.

Returns may increase or decrease as a result of currency fluctuations.

To facilitate compliance with Rule 206(4)-1 under the Investment Advisers Act of 1940, as amended (commonly known as the SEC Marketing Rule), as well as the FAQ guidance from the SEC issued on January 11, 2023, commingled or custom funds that made their first investment prior to April 1, 2009 are excluded from fund level track records and investments which were approved by the Investment Committee prior to April 1, 2009 are excluded from investment level track records. These funds / investments are excluded due to a greater than 50% change in investment committee composition after the acquisition of client account investments by NB Alternatives Advisers LLC (“NBAA”) on March 31, 2009, from its former parent. NBAA’s investment committee composition thereafter has been comprised almost entirely of NB Private Markets investment professionals (as opposed to senior management of its former parent). Track records prior to April 1, 2009 may be provided upon written request.
