COMPANY OVERVIEW

NB Private Equity Partners Limited ("NBPE" or "the Company") is a closed-end investment company registered under the laws of Guernsey managed by NB Alternatives Advisers LLC (the "Investment Manager"), an indirect wholly owned subsidiary of Neuberger Berman Group LLC. NBPE invests in private equity funds managed by leading sponsors, including fund of funds managed by the Investment Manager, and makes direct private equity investments alongside leading sponsors ("co-investments"). NBPE's investment objective is to produce attractive returns on its capital from its private equity investments while managing investment risk through portfolio diversification across asset class, vintage year, geography, industry and sponsor.

INVESTMENT MANAGER COMMENTARY

In light of NBPE's recent announcements, please note that certain information in this monthly report is pro forma for the expected proceeds of the Strategic Asset Sale and the expected up-front proceeds from the realization of the Company's investment in Dresser. The pro forma figures also assume that a portion of the expected proceeds have been used to pay down all outstanding debt under the credit facility.

During November, NBPE funded an aggregate \$4.9 million in two new equity co-investments: a buyout co-investment alongside Veritas Capital in The SI Organization, Inc., a leading provider of high-end systems engineering, integration, modeling simulation analysis and risk mitigation to the U.S. intelligence community; and a buyout co-investment alongside Clayton, Dubilier & Rice in Univar Inc., a leading global distributor of commodity and specialty chemicals to a broad array of end markets.

Including this activity, NBPE invested \$8.8 million into private equity investments and received \$1.8 million of distributions during the month. As a result of this investment activity, the Company's pro forma private equity investment level increased to 94% of NAV at 30 November 2010. Approximately 85% of the pro forma contributions were invested in buyout funds and co-investments, 11% were invested in special situations funds and 4% were invested in growth equity / venture funds. Nearly all of the distributions were from NBPE's investments in Wayzata Opportunities Fund II, Trident IV, Carlyle Europe Partners II and NB Crossroads Fund XVII. In addition, the Company also drew down \$7.5 million on its credit facility in November to fund capital calls and ongoing operations.

As of 30 November 2010, the unaudited NAV per share was \$9.85, which represents an increase of 1.2% compared to the unaudited NAV per share of \$9.74 at 31 October 2010. During November, NBPE's portfolio value increased due to \$6.5 million of unrealized gains attributable to Q3 2010 valuation information for certain fund investments and private co-investments as well as \$2.0 million of unrealized gains on public equity securities. These gains in value were offset by \$1.3 million of negative foreign exchange adjustments and \$0.7 million of unrealized losses on credit-related fund investments.

VALUATION METHODOLOGY

The Company carries its private equity investments on its books at fair value using the best information it has reasonably available to determine or estimate fair value. Publicly traded securities are valued based on quoted prices as of the last day of the relevant period less discounts to reflect legal restrictions, if any, that affect marketability. The Company determines such values for publicly traded securities held directly as well as known public positions held in the underlying private equity investments on a look-through basis. The Company estimates fair value for private interests based on a methodology that begins with the most recent information available from the general partner of the underlying fund or the lead investor of a direct co-investment, and considers subsequent transactions, such as drawdowns or distributions, as well as other information judged to be reliable that reports or indicates valuation changes, including realizations and other portfolio company events. The Company proactively re-values its investments before it has received updated information from the fund manager or lead sponsor if it becomes aware of material events that justify a change in valuation. If the Company concludes that it is probable an investment will be sold, the Company will adjust the carrying value to the amount the Company expects to realize from the sale, exclusive of transaction costs.

SHARE BUY-BACK PROGRAMME

On 21 October 2010, NBPE announced the launch of a share buy-back programme (the "Programme") with the objective of implementing the Capital Return Policy previously announced by the Company. The Programme commenced with effect from 22 October 2010 and, subject to extension, will end on 31 August 2011. Under the terms of the Programme, NBPE has appointed The Royal Bank of Scotland N.V. (London Branch) ("RBS") to manage the Programme and has authorised RBS to effect on-market repurchases of class A ordinary shares on behalf of the Company on Euronext Amsterdam and/or the Specialist Fund Market of the London Stock Exchange plc. Shares bought back under the Programme will be cancelled. The operation of the Company's liquidity enhancement programme on Euronext Amsterdam, which is managed by The Royal Bank of Scotland N.V. pursuant to the liquidity enhancement contract dated 29 June 2010, has been suspended for the duration of the Programme.

During November, a total of 123,482 shares were repurchased under the Programme at an aggregate net purchase price of \$866,982, or a weighted average price per share of approximately \$7.01. There were four days in which transactions were conducted, with an average repurchase volume of 30,871 shares. All of the shares bought back in November were cancelled. The share repurchases during November were accretive to NBPE's NAV by approximately \$0.01 per share. As of 30 November 2010, there were 50,936,110 class A ordinary shares and 10,000 class B ordinary shares outstanding, with 3,150,408 class A ordinary shares held in treasury.

1. Figures provided are unaudited and subject to change. Certain numbers may not total due to rounding.

2. The diversification analysis by asset class and investment type is based on the fair value of underlying fund investments and co-investments (including unfunded commitments on a total private equity exposure basis). The diversification analysis by year of investment, geography and industry is based on the diversification of underlying portfolio company investments at fair value as estimated by the Investment Manager. The year of investment is calculated at the portfolio company level and is defined as the date of capital deployment into a particular underlying investment. For primary investments and co-investments, the vintage year is defined as the date of the first portfolio investment or the date of the co-investment. For secondary investments, the vintage year is defined as the date of the secondary acquisition. The diversification by year of investment also includes an allocation of net cash flows and valuation adjustments made since financial statements were last received from the investment sponsor. Determinations regarding asset class, investment type, geography and industry, as well as the allocation of unfunded commitments on a total private equity exposure basis, also represent the Investment Manager's estimates. Accordingly, the actual diversification of the Company's investment portfolio and the diversification of the Company's investment portfolio on an ongoing basis may vary from the foregoing information.
