31 December 2011¹**VALUATION METHODOLOGY**

The Company carries its private equity investments on its books at fair value using the best information it has reasonably available to determine or estimate fair value. Publicly traded securities are valued based on quoted prices as of the last day of the relevant period less discounts to reflect legal restrictions, if any, that affect marketability. The Company determines such values for publicly traded securities held directly as well as known public positions held in the underlying private equity investments on a look-through basis. The Company estimates fair value for private interests based on a methodology that begins with the most recent information available from the general partner of the underlying fund or the lead investor of a direct co-investment, and considers subsequent transactions, such as drawdowns or distributions, as well as other information judged to be reliable that reports or indicates valuation changes, including realizations and other portfolio company events. The Company proactively re-values its investments before it has received updated information from the fund manager or lead sponsor if it becomes aware of material events that justify a change in valuation. If the Company concludes that it is probable an investment will be sold, the Company will adjust the carrying value to the amount the Company expects to realize from the sale, exclusive of transaction costs.

NBPE expects to issue its 2011 annual financial report in March. The annual financial report will include audited financial information prepared in accordance with accounting principles generally accepted in the United States. NBPE is required to consider, and will consider, all known material information in preparing such annual financial report, including information that may become known subsequent to the issuance of this monthly report. Accordingly, amounts included in the annual financial report may differ from this monthly report.

On 22 October 2010, we launched a new Share Buy-Back Programme in order to begin implementing the Capital Return Policy. The Share Buy-Back Programme commenced immediately and, subject to extension, will end on 31 March 2012. Under the terms of the new programme, The Royal Bank of Scotland N.V.(London Branch) and The Royal Bank of Scotland plc (together, "RBS") have been appointed to effect on-market repurchases of Shares on behalf of NBPE on Euronext Amsterdam and/or the Specialist Fund Market of the London Stock Exchange. 1. Figures provided are unaudited and subject to change. Certain numbers may not total due to rounding.

2. Total exposure and unfunded percentages exclude the recent \$200 million commitment to NB Alternatives direct co-investment program, as capital deployment is opportunistic and cannot be accurately forecast at this time. The diversification analysis by asset class and investment type is based on the fair value of underlying fund investments and direct / co-investments (including unfunded commitments on a total private equity exposure basis). The diversification analysis by year of investment, geography and industry is based on the diversification of underlying portfolio company investments at fair value as estimated by the Investment Manager. The year of investment is calculated at the portfolio company level and is defined as the date of capital deployment into a particular underlying investment. For primary investments and direct / co-investments, the vintage year is defined as the date of the first portfolio investment or the date of the direct / co-investment. For secondary investments, the vintage year is defined as the date of the secondary acquisition. The diversification by year of investment also includes an allocation of net cash flows and valuation adjustments made since financial statements were last received from the investment sponsor. Determinations regarding asset class, investment type, geography and industry, as well as the allocation of unfunded commitments on a total private equity exposure basis, also represent the Investment Manager's estimates. Accordingly, the actual diversification of the Company's investment portfolio and the diversification of the Company's investment portfolio on an ongoing basis may vary from the foregoing information.
