Performance Analysis

For the Nine Month Period Ended 30 September 2017

Quarterly Report

PERFORMANCE OVERVIEW

During the first nine months of 2017, excluding investment cash flows, private equity fair value appreciated by \$85.4 million, largely driven by direct investments. NBPE received cash distributions of \$107.6 million during the year from equity investments, primarily as a result of seven full exits. NBPE also received \$62.6 million of distributions from income investments consisting primarily of principal and interest payments. Legacy fund investments continue to run off and generate liquidity, distributing \$40.2 million to NBPE during the first nine months of 2017.

Note: Income investment appreciation includes both fair value appreciation as a result of accrued cash interest as well as accrued non-cash (Payment in Kind "PIK") yield.

INVESTMENT MANAGER'S REPORT

Portfolio Overview

For the Nine Month Period Ended 30 September 2017

Quarterly Report

PORTFOLIO OVERVIEW

NBPE's portfolio is comprised of direct equity investments, income investments and fund investments. Direct investments, which include direct equity and income investments, represent approximately 85% of private equity fair value. NBPE's fund portfolio consists of 34 fund investments, all of which are past their investment periods. These fund investments are expected to continue to liquidate in the coming years and will be replaced with new direct investment exposure over time.

Actual unfunded commitments is comprised of \$161.4 million, \$53.3, and \$39.0 million to direct equity investments, income investments, and fund investments, respectively. Actual total exposure is \$727.1 million, \$191.3 million, and \$159.7 million to direct equity investments, income investments, and fund investments, respectively.

INVESTMENT MANAGER'S REPORT

Portfolio Diversification

For the Nine Month Period Ended 30 September 2017
Quarterly Report

DIVERSIFICATION ANALYSIS

NBPE invests directly into private equity backed companies, pursuing the securities that the Manager believes present the most attractive risk / return opportunity. Currently the portfolio is weighted to equity investments, and 17% of the portfolio is in income investments. Fund investments represent 15% of private equity fair value but the fund portfolio will continue to become a smaller portion of NBPE's private equity fair value as capital is re-deployed into direct investments over time.

NBPE's portfolio is weighted to North American investments. This is the largest private equity market globally and the Manager believes the overall dynamics in this market relative to other geographies have offered the most attractive investment opportunities. The Manager is constantly monitoring and evaluating markets globally and may adjust this strategy over time. Approximately 9% of NBPE's portfolio is invested in European companies and 5% in other parts of the world, primarily Asia and Latin America.

NBPE's portfolio is broadly diversified across industries. The Manager does not set specific industry targets, because the Manager believes this could lead to selecting sub-optimal investments to meet a target. Instead the Manager looks for companies backed by high quality general partners with strong business characteristics in favoured sectors that the Manager believes can grow faster than gross domestic product.

Note: Numbers may not sum due to rounding.

INVESTMENT MANAGER'S REPORT

Unfunded Commitments & Capital Resources

For the Nine Month Period Ended 30 September 2017
Quarterly Report

UNFUNDED COMMITMENTS & CAPITAL RESOURCES

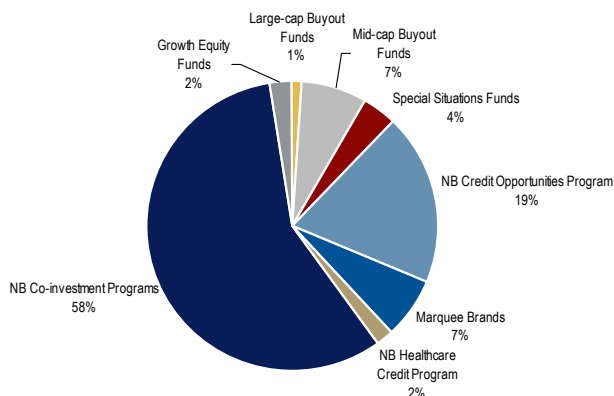

As of 30 September 2017, NBPE's unfunded commitments were approximately \$253.7 million. Approximately \$144.0 million, \$4.5 million, \$48.8 million, and \$16.9 million were unfunded commitments to the NB Alternatives Co-investment and Healthcare Credit Programs, NB Credit Opportunities Program and Marquee Brands, respectively. Approximately \$13.6 million of unfunded commitments were to funds of funds managed by the Manager and \$25.4 million of unfunded commitments were to third party direct funds. Within the fund portfolio, \$39.0 million of the unfunded commitments are to funds past their investment period. The Manager believes a large portion of this amount is unlikely to be called. However, some amount may be called for fees, expenses and / or follow-on investments.

The Manager analysed the unfunded commitments on an adjusted basis. Unfunded commitments were adjusted by removing unfunded commitments past their investment period, amounts which NBPE has the ability to terminate if it so chooses, and unfunded commitments to funds managed by the Manager. Following these adjustments, the unfunded commitments were \$19.9 million.

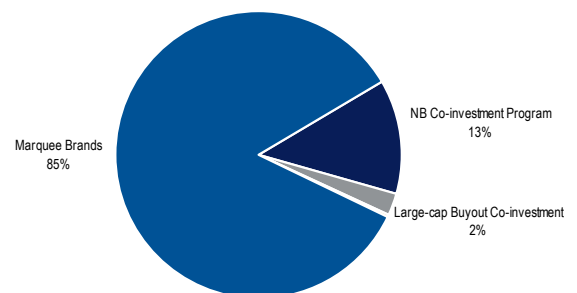

As of 30 September 2017, NBPE had \$67.0 million of cash and \$150.0 million of available borrowings under the 2016 Credit Facility (as defined on the following page), totaling \$217.0 million of total capital resources. On an adjusted basis this corresponds to excess capital resources of \$197.1 million and a commitment coverage ratio of 1,090%.

INVESTMENT MANAGER'S REPORT

Credit Facility Overview

For the Nine Month Period Ended 30 September 2017

Quarterly Report

CREDIT FACILITY OVERVIEW

On 7 June 2016, the Company entered into an agreement with JP Morgan Chase Bank, N.A. (the "2016 Credit Facility") to refinance the 2012 Credit Facility. The 2016 Credit Facility's availability is up to \$150.0 million (including a \$25.0 million accordion whereby the Company is able to increase available borrowings) that expires on 7 June 2021. Beginning in year four, the 2016 Credit Facility carries mandatory amortisation of outstanding balances of 25% per calendar quarter. The 2016 Credit Facility is guaranteed by the Company (the "Parent Guarantor") as well as all of the Company's subsidiaries (except for NB PEP Investments LP (Incorporated), being the borrower under the 2016 Credit Facility) and secured by substantially all of the assets of the Parent Guarantor and its subsidiaries. At 30 September 2017, there were no amounts borrowed under the 2016 Credit Facility.

Under the 2016 Credit Facility, the interest rate is calculated as LIBOR (based on 3-month LIBOR) plus 3.75% per annum. In addition, under the 2016 Credit Facility, the Company is required to pay an undrawn revolving fee of 1.25% per annum on the daily balance of the unused facility amount. The Company is also subject to certain minimum draw requirements, which if not met, subjects the Company to an additional utilisation fee on any undrawn amounts that are below the minimum draw requirement.

Under the 2016 Credit Facility, the Company is required to meet a maximum over-commitment test, certain loan-to-value ("LTV") ratios, performance event tests and certain portfolio concentration tests.

The maximum over-commitment test is performed on an adjusted unfunded basis, and is designed to limit the amount of unfunded obligations the Company and its subsidiaries may enter into. Adjusted unfunded obligations cannot exceed the lesser of: 1) \$50 million, plus unrestricted cash, plus the undrawn credit facility and 2) 15% of the adjusted market value of eligible investments.

The Company is subject to a number of LTV ratios in order to be in compliance with the 2016 Credit Facility. The drawdown LTV ratio is 25% and the maximum LTV ratio is 40%. If the LTV ratio exceeds 40%, the Company is subject to certain

requirements to lower the LTV ratio to the maintenance margin of 35%, within certain timeframes. If at any time the LTV ratio exceeds 60%, the Company is forced to make prepayments on the loan balance on an expedited basis.

Certain cash distributions, including dividends, are subject to an LTV release ratio of less than 35%, unless a performance event has occurred. The performance event test is measured against the level of the S&P 500 index. If the S&P 500 index value falls by 30% in any 120 day period, certain cash distributions, including dividends, are subject to an LTV release ratio of 20%.

The Company is subject to certain portfolio concentration tests which limit the amount of exposure the Company may have in certain areas.

At 30 September 2017, the Company met all requirements under the 2016 Credit Facility.

Note: Numbers may not sum due to rounding.

VALUATION METHODOLOGY

Equity

The Company carries private equity investments at fair value using the best information the Manager has reasonably available to determine or estimate fair value. Publicly traded securities are valued based on quoted prices as of the last day of the relevant period less discounts to reflect legal restrictions associated with the securities, if any, that affect marketability. The Manager determines such values for publicly traded securities held directly as well as known public positions held in the underlying private equity investments on a look-through basis. The Manager estimates fair value for private interests based on a methodology that begins with the most recent information available from the general partner of the underlying fund or the lead investor of a direct co-investment, and considers subsequent transactions, such as drawdowns or distributions, as well as other information judged to be reliable that reports or indicates valuation changes, including realizations and other portfolio company events. The Manager proactively re-values investments before receiving updated information from the fund manager or lead sponsor if the Manager becomes aware of material events that justify a change in valuation. If the Manager concludes that it is probable that an investment will be sold, the Manager adjusts the carrying value to the amount expected from the sale, exclusive of transaction costs.

Debt

The Manager estimates the enterprise value of each portfolio company and compares such amount to the total amount of the company's debt as well as the level of debt senior to the Company's interest. Estimates of enterprise value are based on a specific measure (such as EBITDA, free cash flow, net income, book value or NAV) believed to be most relevant for the given company and compares this metric in relation to comparable company valuations (market trading and transactions) based on the same metric. In determining the enterprise value, the Manager will further consider the companies' acquisition price, credit metrics, historical and projected operational and financial performance, liquidity as well as industry trends, general economic conditions, scale and competitive advantages along with other factors deemed relevant. Valuation adjustments are made if estimated enterprise value does not support the value of the debt security the Company is invested in and securities senior to the Company's position.

If the principal repayment of debt and any accrued interest is supported by the enterprise value analysis described above, the Manager will next consider current market conditions including pricing quotations for the same security and yields for similar investments. To the extent market quotations for the security are available, the Manager will take into account current pricing and liquidity. Liquidity may be estimated by the spread between bid and offer prices and other available measures of market liquidity, including number and size of recent trades and liquidity scores. If the Manager believes market yields for similar investments have changed substantially since the pricing of the security, the Manager will perform a discounted cash flow analysis, based on the expected future cash flows of the debt securities and current market rates. The Manager will also consider the maturity of the investment, compliance with covenants and ability to pay cash interest when estimating the fair value of debt investments.

FORWARD LOOKING STATEMENTS

This report contains certain forward-looking statements. Forward-looking statements speak only as of the date of the document in which they are made and relate to expectations, beliefs, projections (including anticipated economic performance and financial condition), future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts and are subject to risks and uncertainties including, but not limited to, statements as to:

- future operating results;
- business prospects and the prospects of the Company's investments;
- the impact of investments the Company expects to make;
- the dependence of future success on the general economy and its impact on the industries in which the Company invests;
- the ability of the investments to achieve their objectives;
- differences between the investment objective and the investment objectives of the private equity funds in which the Company invests;
- the rate at which capital is deployed in private equity investments, co-investments and opportunistic investments;
- expected financings and investments;
- the continuation of the Investment Manager as the service provider and the continued affiliation with the Investment Manager of its key investment professionals;
- the adequacy of the Company's cash resources and working capital; and
- the timing of cash flows, if any, from the operations of the underlying private equity funds and the underlying portfolio companies.

In some cases, forward-looking statements may be identified by terms such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan," "potential," "should," "will," and "would," or the negative of those terms or other comparable terminology.

The forward-looking statements are based on the beliefs, assumptions and expectations of the future performance, taking into account all information currently available to the Manager. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to the Manager or are within the Manager's control. If a change occurs, the business, financial condition, liquidity and results of operations may vary materially from those expressed in the forward-looking statements. Factors and events that could cause the business, financial condition, liquidity and results of operations to vary materially include, among other things, general economic conditions, securities market conditions, private equity market conditions, the level and volatility of interest rates and equity prices, competitive conditions, liquidity of global markets, international and regional political conditions, regulatory and legislative developments, monetary and fiscal policy, investor sentiment, availability and cost of capital, technological changes and events, outcome of legal proceedings, changes in currency values, inflation, credit ratings and the size, volume and timing of transactions, as well as other risks described elsewhere in this report and the prospectus relating to the Company's IPO and the Company's prospectus relating to the ZDP Shares.

The foregoing is not a comprehensive list of the risks and uncertainties to which the Company is subject. Except as required by applicable law, the Manager undertakes no obligation to update or revise any forward-looking statements to reflect any change in The Manager's expectations, or any changes in events, conditions or circumstances on which the forward-looking statement is based. In light of these risks, uncertainties and assumptions, the events described by the Company's forward-looking statements might not occur. The Manager qualifies any and all of the forward-looking statements by these cautionary factors.
