Investment Strategy

Actively pursuing direct co-investments and direct yielding investments

- Our intention is that new investments will be predominantly equity co-investments or direct yielding investments
 - Equity co-investments: minority investments alongside premier private equity sponsors in their core areas of expertise
 - Direct yielding investments: debt generating strong cash yields and in many cases additional upside through PIK and / or equity
 - Healthcare credit investments: royalty notes and junior financing backed by healthcare assets and / or companies
- NB Alternatives expects that direct investments will comprise a majority of NAV by the end of 2013
 - Target allocations are approximately 40% direct yielding investments and 60% direct co-investments, subject to an available set of opportunities
- We expect this strategy to reduce the duration of our private equity portfolio, increase transparency for shareholders and reduce our overall expense ratio
- As our exposure to yielding investments increases, NBPE will have the flexibility to pay regular dividends out of income

DIRECT INVESTMENTS: INCREASINGLY SIGNIFICANT¹

- NBPE has submitted redemption requests for positions in two Special Situations funds, which should generate ~\$25 million of cash over the rest of 2012
- In addition, the remaining Special Situations Fund portfolio is in distribution mode and is decreasing as a percentage of NAV
- \$27.3 million of NBPE's unfunded commitments are past their investment period

Capital Return Policy & Ordinary Share Repurchases

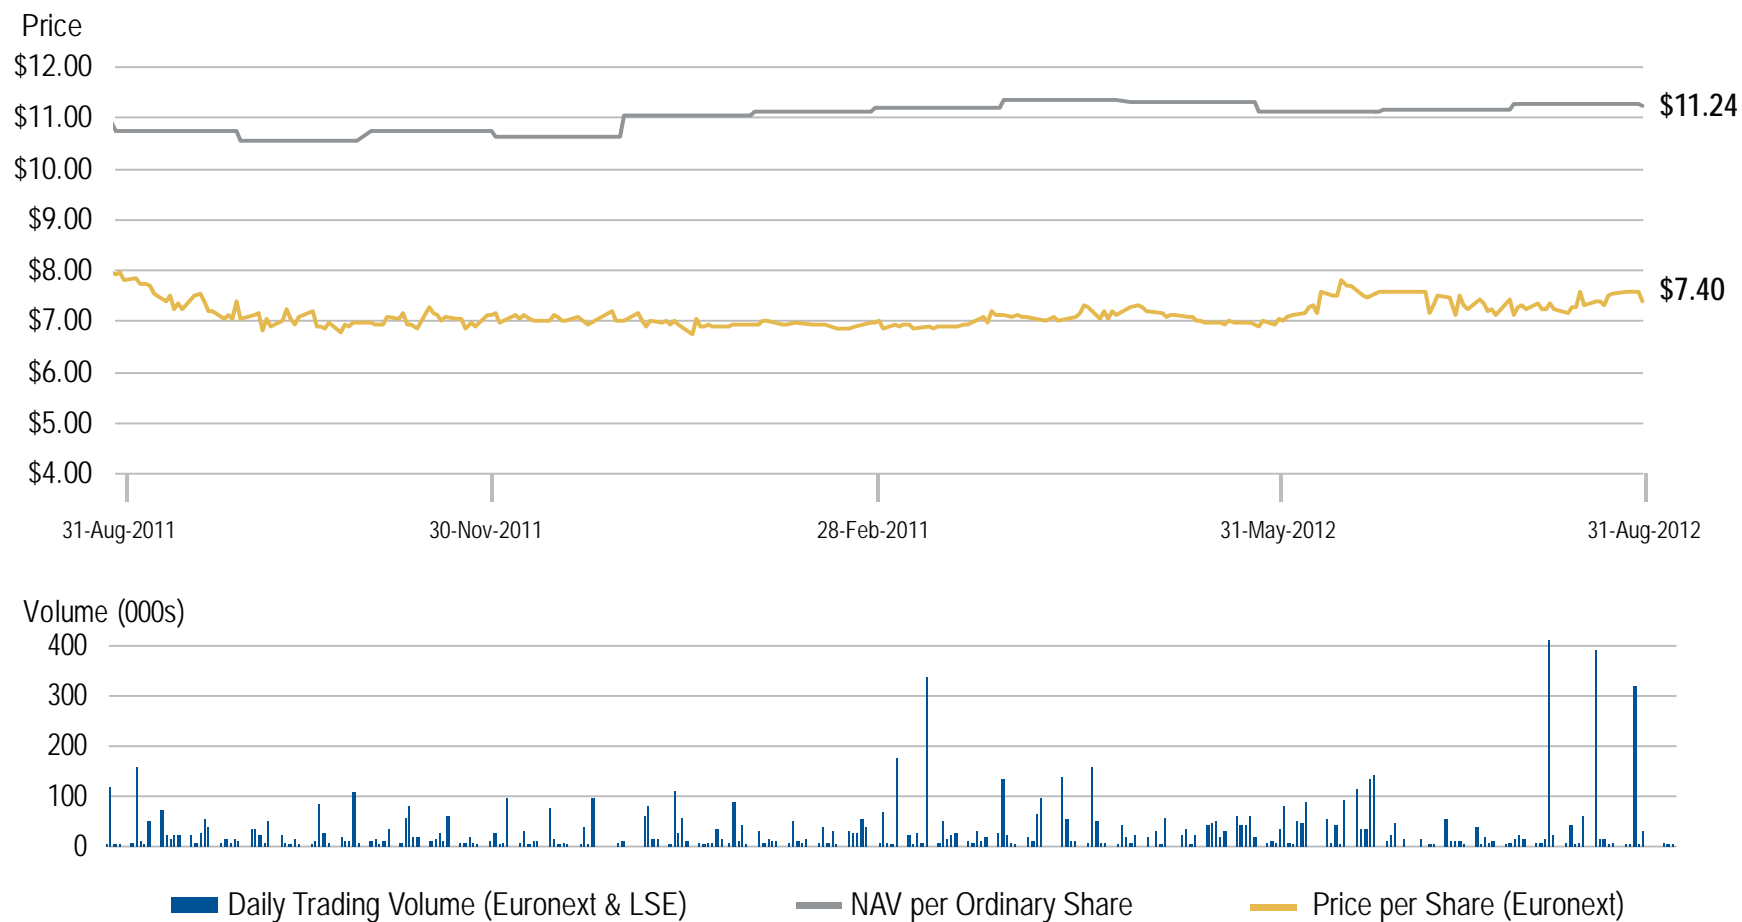

NBPE has used Share repurchases to return capital to Shareholders since implementing the Capital Return Policy. With an increased allocation to direct yielding investments, NBPE will have the flexibility to pay regular dividends out of income

- The Capital Return Policy is a long-term capital management policy of ongoing returns of capital to NBPE Shareholders implemented in October 2010
- Under the Capital Return Policy, the Board has indicated the Company's intention to, for each half-year period, return 50% of the net realized increase in NAV attributable to the ordinary shares to shareholders (the "Capital Return Policy Amount"). This will be accomplished by way of share repurchases, dividends or other such means as the Directors consider most efficient
 - Since launching the Capital Return Policy, NBPE has repurchased 2,221,823 shares at a weighted average price per share of \$7.27 (accretive to NAV per share by ~\$0.17)
 - For the period from 1 January 2011 and ending 30 June 2011 the Capital Return Policy amount was approximately \$1.7 million. For the period from 1 July 2011 and ending 31 December 2011 the Capital Return Policy Amount was approximately \$0.3 million
 - During 2011, NBPE returned capital to shareholders by way of share repurchase by repurchasing 1,387,656 shares at a weighted average price per share of \$7.41, which was over 6x more capital than allocated by the Capital Return Policy
 - For the period from 1 January 2012 and ending 30 June 2012 the Capital Return Policy amount was approximately \$3.8 million
 - YTD 2012, NBPE has returned capital to shareholders by way of share repurchase by repurchasing 507,400 shares at a weighted average price per share of \$7.04
- To date, NBPE has used Share repurchases to return capital to Shareholders; as NBPE's exposure to direct yielding investments increases, we believe NPBE will have the flexibility to pay regular dividends out of income. The Board of Directors will continue to determine the most appropriate means of returning capital to shareholders

Note: As of 31 August 2012 (unaudited). Share re-purchase data as of 31 August 2012.
