New Direct Investment Activity during the first quarter of 2015

- 4 Equity Co-investments
- **5** Income Investments
- Assumes re-investment of dividends.
- Includes follow-on investments and contributions to fund investments.
- 3. Invested amounts in new direct investments only. Excludes follow-on investments.

COMPANY DIVIDEND POLICY

For the three month period ended 31 March 2015 **Quarterly Report**

Long-term dividends

On 27 February 2015, the Company paid the first 2015 semi-annual dividend of \$0.23 per Share.

During 2014, NBPE paid dividends of \$0.45 per Share. Since inception, NBPE has paid cumulative dividends of \$1.09 per Share.

Income Investments

As of 31 March 2015, on a run rate basis the income portfolio generates cash income of \$29.7 million or approximately \$0.61 per Share. Based on dividends paid during 2015, this corresponds to approximately 132% dividend coverage from the cash yield on the Company's income portfolio.

Share Buy Back Programme

NBPE launched a Share Buy Back Programme in 2010 whereby NBPE retains the ability to repurchase Class A Shares. Class A Shares bought back under this Share Buy Back Programme will be cancelled. There were no share repurchases during the first quarter of 2015.

Prior to the launch of the Share Buy Back Programme, the Company maintained a Liquidity Enhancement Agreement, which expired in 2011. Class A Shares bought back prior to the launch of the Share Buy Back Program, which were repurchased under the Company's Liquidity Enhancement Agreement, are held as Treasury Shares.

The Board of Directors has approved an extension of the Share Buy Back Programme until 31 August 2015. The documentation for such extension is currently in progress.

COMPANY STRATEGY

Focus on equity co-investments and income investments

The Manager seeks high quality private equity investments for NBPE that have the potential to deliver strong investment returns on a risk-adjusted basis, while maintaining appropriate levels of diversification across geographies, industries, vintage years and sponsors.

New investments are predominantly equity co-investments and income investments. Within this direct portfolio, across cycles, the Manager targets average allocations of 60% of private equity fair value to equity co-investments and 40% of private equity fair value to income investments. At any point in time allocations in the portfolio may vary from this target due to the relative attractiveness of the available opportunity sets. The Manager may also make other types of investments, as appropriate.

Direct Investments by Quarter

Equity co-investments are made alongside premier private equity sponsors in their core areas of expertise, focused primarily on buyout and growth equity transactions in the small and middle market globally. Transaction types typically include traditional buyouts, take-private transactions, corporate carve-outs as well as sponsor-to-sponsor transactions. The Manager seeks investments with differentiating characteristics such as strategic, minority investments that have clear exit paths and the potential for shorter holding periods rather than large, syndicated transactions.

Income investments typically consist of private debt instruments which generate strong cash yields and may offer additional upside through PIK and / or equity. The Manager targets debt investments such as junior financings including mezzanine investments, which consist of notes and equity, second-lien debt and secured term loans in traditional corporate sectors. The Manager also targets healthcare credit investments, which consist of loans to companies in the healthcare sector, royalty backed notes, preferred stock and warrants.

PORTFOLIO HIGHLIGHTS DURING THE FIRST QUARTER OF 2015

For the three month period ended 31 March 2015

Quarterly Report

NBPE leverages the full resources of the Manager's integrated private equity platform for superior deal flow, due diligence and execution capabilities

Continued focus on direct investments has meaningfully refocused the portfolio in line with our strategy

- Direct investment exposure of 92% of NAV at 31 March 2015, up from 88% of NAV as of 31 December 2014
- During the first quarter of 2015:
 - 9 direct investments completed
 - \$15.7 million of new and follow-on income investments
 - \$27.6 million of new and follow-on equity co-investments
 - Only \$4.1 million of capital calls from fund investments

48% of net asset value in direct income investments with a total estimated yield to maturity of 10.3% and a cash yield of 8.7%

Income investments producing run-rate cash income of \$29.7 million, covering 132% of the 2015 annual dividend¹

Significant liquidity from direct investments during the first quarter of 2015

- Distributions of \$14.8 million from equity co-investments and \$12.0 million from income investments, including:
 - \$3.7 million of realisation proceeds from the income portfolio including principal, pre-payment premiums and associated equity
 - \$8.3 million of interest received from income investments
 - \$14.8 million from equity co-investments as a result of sales, re-capitalisations and secondary sales of public shares

Fund investment portfolio continues to mature and return cash to NBPE

• Total distributions of \$10.5 million from fund investments during the first quarter of 2015

^{1.} Based on \$0.23 per share paid during the first quarter of 2015.

POST-REPORTING PERIOD UPDATE

The following events occurred post the 31 March 2015 reporting period. The Board is not aware of any other significant events or transactions (other than as set out herein) that have occurred between 31 March 2015 and the publication date of this Interim Management Statement which would have a material impact on the financial position of the Company

New income investment activity

- · During April, NBPE funded \$2.2 million to one new income investment
 - Additional amounts funded to a portfolio which purchases small business loans in the U.S., originated through a direct lending platform
- Run rate cash income is \$28.4 million, representing 127% dividend coverage

Direct equity co-investment activity

- During April, NBPE funded \$6.6 million to two equity co-investments
 - Prosper, a peer-to-peer online lending marketplace for unsecured consumer credit loans
 - Riverbed, a company which provides application performance infrastructure

Distribution activity

- During April, NBPE received \$20.1 million of distributions
 - \$2.5 million from fund investments
 - \$17.4 million from income investments
 - \$0.1 million from equity investments
- Proceeds received from the exit of a 2014 investment in the second lien term loan of Ikaria

NAV per Share performance and credit facility borrowings post 31 March 2015

- The 31 March 2015 Quarterly NAV per Share represents a 1.0% increase over the 31 March 2015 estimated NAV per Share
- The 30 April 2015 NAV per Share represents a 0.2% increase over the 31 March 2015 Quarterly IMS NAV per Share

Unaudited NAV per share	31 March 2015	31 March 2015	30 April 2015
	(Estimated NAV)	(Quarterly IMS)	(Estimated NAV)
	\$14.25	\$14.39	\$14.42
Unaudited Total Return NAV per share	\$15.34	\$15.48	\$15.51

• During April 2015, NBPE paid down \$15 million from the Company's credit facility. Post 30 April 2015, NBPE drew down an additional \$5 million from the Company's credit facility

Note: as of 13 May 2015. Numbers may not sum due to rounding.

INVESTMENT ACTIVITY

For the three month period ended 31 March 2015

Quarterly Report

Q1 2015 OVERVIEW

\$15.7 million invested in income investments

Made directly by NBPE and through the NB Alternatives Healthcare Credit Investment Program

- Provider of end-to-end outsourced commerce, payments, and marketing solutions to companies in the U.S., Europe and Asia Pacific regions
- First lien term loan with a 6.75% annual cash interest coupon (L +5.75%, 1% L Floor and 1.0% OID)
- Second lien term loan with a 12.0% annual cash interest coupon (L+11.0%, 1% L Floor and 1.0% OID)
- NB Thesis:
 - Highly recurring revenue base
 - Strong cash flow characteristics
 - Industry leading product with a strong value proposition

- Portfolio of short term loans to small businesses in the U.S. originated through a direct lending platform
- NB Thesis:
 - Opportunity to participate in the rapidly growing area of disintermediated bank lending
 - Geographic diversification with exposure to small businesses across the U.S.

Healthcare Credit: Royalty Notes (Biotechnology)

- Royalty-backed notes secured by the royalty rights and milestone payments of two type two diabetes treatments
- Cash interest rate of 9.375%
- NB Thesis:
 - Strong collateral and milestone payments
 - Attractive yield

- Precision machining company that focuses on the manufacturing and joining of critical components and complex assemblies for medical implants, as well as other industries including aerospace / defense and specialty commercial/industrial markets
- Second lien term loan with a 9.5% annual cash interest coupon (L+8.5%, 1% L Floor and 6.0% OID)
- NB Thesis:
 - Attractive cash yield
 - High margins and recurring revenue

INVESTMENT ACTIVITY

For the three month period ended 31 March 2015

Quarterly Report

Q1 2015 OVERVIEW

\$21.2 million invested in equity co-investments¹

Made directly by NBPE and through the NB Alternatives Co-investment Program

- Provider of end-to-end outsourced commerce, payments, and marketing solutions to companies in the U.S., Europe and Asia Pacific regions
- NB Thesis:
 - Highly recurring revenue base
 - Strong cash flow characteristics
 - Industry leading product with a strong value proposition

- Provider of wide area network ("WAN") optimization and performance management products
- NB Thesis:
 - Clear market leader with a predictable and stable revenue base
 - Attractive and growing end markets
 - Executable value creation opportunities

- Leading provider of outsourced route services to the laundry and air vending markets
- NB Thesis:
 - Leader in a large addressable market
 - Attractive "mid-life" characteristics
 - Well diversified and loyal customer base
 - Multiple growth opportunities available

- Developer of a global cyber situational awareness platform that helps enterprise and government organizations protect against targeted cyber attacks
- NB Thesis:
 - Opportunity to invest in a strong platform company with significant growth opportunities
 - Existing strong customer base

Note: Numbers may not sum due to rounding.

- Excludes \$6.4 million of follow on investments.
- A capital call was issued in Q1 2015, but the transaction closed in Q2 2015.

NAV RESULTS

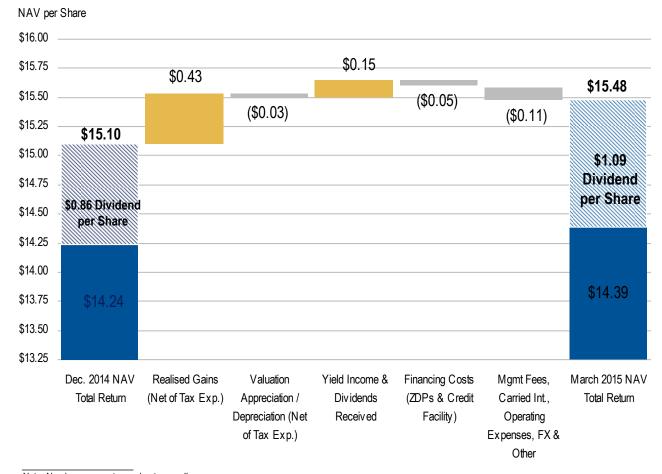

Q1 2015 OVERVIEW

NAV RESULTS

During the first quarter of 2015, including the Company's semi-annual dividends, the NAV per Share total return was 2.5%1. Including the impact of the dividend payment, NBPE's NAV per Share increased 1.0%, driven by realised gains in the underlying investment portfolio and offset by financing costs, including ZDP and credit facility expenses, as well as management fees, carried interest, operating and other expenses and FX. Excluding investment cash flows, NBPE's private equity fair value appreciated by \$27.0 million, net of underlying fees and expenses.

Key changes to NBPE's NAV per Share:

- \$20.8 million of realised gains, or \$0.43 per Share, net of tax expense
- \$1.7 million of unrealised losses, or (\$0.03) per Share, net of tax expense
- \$7.3 million of yield income and dividends, or \$0.15 per Share
- \$7.9 million of operating expenses and other expenses, or (\$0.16) per Share
- \$11.2 million of dividends paid, or \$0.23 per Share

Note: Numbers may not sum due to rounding.

^{1.} Total return assumes re-investment of dividends.

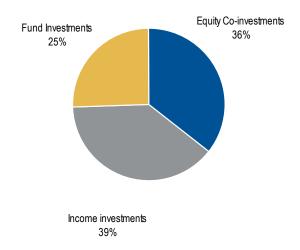

PORTFOLIO ANALYSIS

PORTFOLIO OVERVIEW

NBPE's portfolio is comprised of three investment types: income investments, which consist of corporate private debt and healthcare credit investments, equity co-investments and fund investments. Equity co-investments and income investments represent approximately 75% of private equity fair value. NBPE's fund portfolio consists of 35 fund investments, many of which are past their investment periods, giving the portfolio exposure to mature underlying companies and securities. As cash distribution activity from funds continue, the Manager intends to fund new direct investments.

	Investments	Private Equity Fair Value	Adjusted Unfunded Commitments ¹	Adjusted Total Exposure ¹
Equity Co-investments	62	\$311.4m	\$54.0m	\$365.4m
Income Investments	46	\$339.9m	\$30.3m	\$370.2m
Fund Investments	35	\$222.8m	\$6.6m	\$229.4m
Total Private Equity Investments	143	\$874.1m	\$91.0m	\$965.1m

Portfolio Diversification by Fair Value

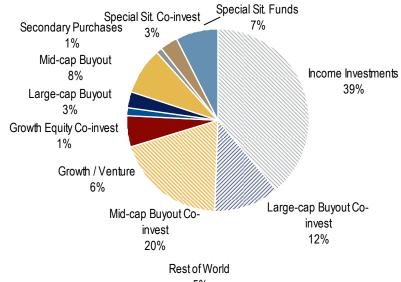

Note: Numbers may not sum due to rounding.

^{1.} Please refer to page 28 for more information on unfunded commitments to funds past their investment period. Actual unfunded commitments and total exposure is \$130.4 million and \$1,004.5 million. Actual unfunded commitments is comprised of \$68.6 million, \$15.8 million and \$46.0 million to equity co-investments, income investments and fund investments, respectively. Actual total exposure is \$380.0 million, \$355.7 million and \$268.9 million to equity co-investments, income investments and fund investments, respectively.

PORTFOLIO DIVERSIFICATION

PORTFOLIO ANALYSIS

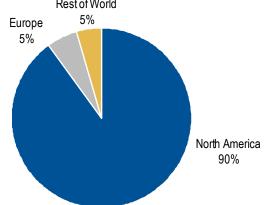

Diversified private equity assets and industry exposure with a tactical over allocation to North America (% of Fair Value)

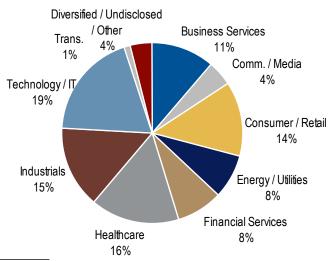

Portfolio Diversification

NBPE adapts its asset allocation over time to tactically allocate the portfolio to what the Manager believes are the most attractive opportunities. NBPE's current allocation is weighted to income investments and equity coinvestments. Fund investments represent 25% of private equity fair value and the Manager expects the fund portfolio to become a smaller portion of NBPE's private equity fair value as capital is re-deployed into direct investments.

NBPE's portfolio is tactically over allocated to North America. The Manager believes the overall health in this market relative to other geographies offers attractive investment opportunities. Within NBPE's European exposure, many companies have significant scale and share within their markets or revenue bases from multiple countries. Approximately 5% of NBPE's portfolio is invested in other parts of the world, primarily Asia and Latin America.

NBPE's portfolio is broadly diversified across industries. The Manager does not set specific industry targets, because the Manager believes this could lead to selecting sub-optimal investments to meet a target. Instead the Manager looks for companies backed by high quality general partners with strong business characteristics in favoured sectors that the Manager believes can grow faster than GDP.

Note: Numbers may not sum due to rounding.

CURRENT FAIR VALUE BY YEAR OF DEPLOYMENT

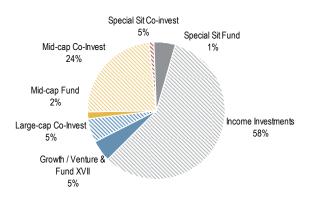

For the three month period ended 31 March 2015 Quarterly Report

PORTFOLIO ANALYSIS

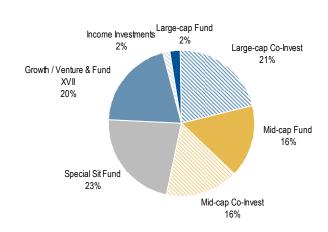

Recent capital deployment is primarily concentrated in direct investments (% of Fair Value)

The pie charts below represent the percentage of the current private equity fair value by year of investment. Year of investment is defined as the date of capital deployment into a particular underlying company. This differs from the vintage year as vintage year shows when a fund was formed rather than when the capital was deployed.

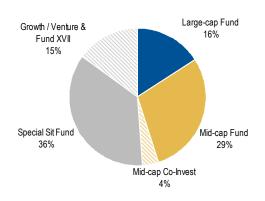

2013 - 2015 (67% of Fair Value)

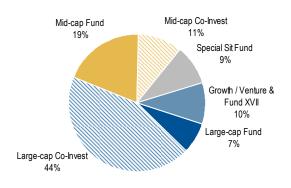

2010 - 2012 (12% of Fair Value)

2008 & 2009 (9% of Fair Value)

2007 & Earlier (12% of Fair Value)

Note: Numbers may not sum due to rounding. Based on private equity fair value as of 31 March 2015.

UNREALIZED EQUITY CO-INVESTMENT & INCOME INVESTMENT PORTFOLIO

For the three month period ended 31 March 2015

Quarterly Report

PORTFOLIO ANALYSIS

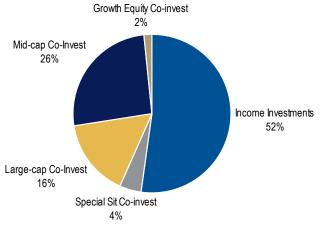

Equity co-investments and income investments portfolio diversification

As of 31 March 2015, the private equity fair value of the direct investment portfolio, was \$651.3 million. Approximately \$311.4 and \$339.9 million was held in equity co-investments and income investments, respectively. Within the direct investment portfolio 52% of fair value is invested in income investments and 26% is invested in mid-cap buyout equity co-investments. The industry diversification is broad, allocated to what the Manager believes are attractive investment opportunities in business services, industrials, technology / IT, healthcare and others.

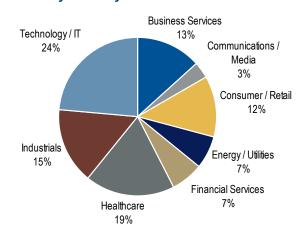

Approximately 87% of the direct investment fair value is in investments made since the beginning of 2011, which demonstrates the young age of the portfolio. The Manager continues to be selective in making new investments and believes NBPE has built an attractive portfolio of direct private equity investments.

The direct investment portfolio is allocated primarily to North America. The Manager's current expectation is that this allocation will continue, with investments made in other geographies on an opportunistic basis.

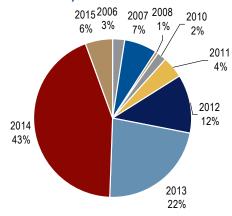

Fair Value by Asset Class

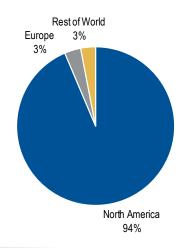

Fair Value by Industry

Fair Value by Year of Investment (Incl. Follow-ons)

Fair Value by Geography

PORTFOLIO ANALYSIS

Total Large-cap Buyout				\$9
Total Equity Co-investments				\$31

NBPE's equity co-investments are primarily mid-cap and largecap buyout investments. diversified across vintage years, geographies and industries. The Manager believes these companies are poised for value creation and are an attractive component of NBPE's private equity portfolio. Many companies benefit from highly experienced and capable management teams and sponsor groups, which the Manager thinks is critical to the investment thesis and outcome.

In addition, the Manager believes many of these companies benefit from strong industry growth or secular trends and have the opportunity to appreciate in value from operational enhancements, growth of product offerings or expanding into new markets. The Manager thinks these characteristics distinguish NBPE's investment portfolio.

No individual company within NBPE's equity co-investment portfolio accounts for more than 5.0% of NBPE's net asset value.

Note: Numbers may not sum due to rounding. Based on private equity fair value as of 31 March 2015.

^{*}Due to confidentiality, company names cannot be disclosed.

INCOME INVESTMENT PORTFOLIO¹

For the three month period ended 31 March 2015 **Quarterly Report**

PORTFOLIO ANALYSIS

46 income investments in corporate private debt and healthcare credits with a total fair value of \$339.9 million

On a run rate basis, the investments in the income portfolio generate cash and PIK income of \$30.2 million. The corporate private debt portfolio is broadly diversified across sectors including business services, industrials and technology. The Manager believes securities within this portfolio benefit from strong customer bases, diversified revenue sources and favourable industry dynamics. Many of the debt securities are cash-pay at strong yields from a risk-return perspective. The weighted average cash yield on NBPE's corporate private debt investments is 9.2%. The weighted average total leverage and senior leverage is 4.5x and 3.1x, respectively. Approximately 75% of value within corporate private debt investments is invested in floating rate debt. The healthcare credit investments consist of royalty backed notes and senior secured loans with a weighted average cash yield of 7.8%. No individual company within the income portfolio represents more than 3.0% of NBPE's net asset value.

^{*} Due to confidentiality, company names cannot be disclosed.

^{1.} The mezzanine debt investments include equity investments completed as part of the mezzanine transaction and the fair value includes the value of these equity investments. The yield to maturity is inclusive of PIK interest and represents the return (IRR) from this reporting period to the maturity of the investment. Cash yield calculations include \$18.9 million of value associated with equity investments and \$321.0m of debt value.

^{2.} Based on the net leverage that is senior to the security held by NBPE.

^{3.} Based on the fair value of the debt only and excludes the fair value of equity investments and warrants.

^{4.} Includes two portfolios of small business loans (\$6.8m of fair value) at an interest rate at least at the rate stated above but not included in the yield calculation.

PORTFOLIO VALUATION¹

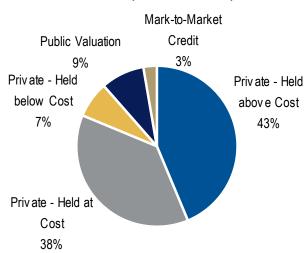

For the three month period ended 31 March 2015 Quarterly Report

PORTFOLIO ANALYSIS

By Date of Information & Valuation Type (% of Fair Value)¹

Priv ate Funds (12/31/2014) Public Valuation (3/31/2015) 9% Credit-related Funds (3/31/2015) 3% Priv ate Funds & Directs (3/31/2015) 79%

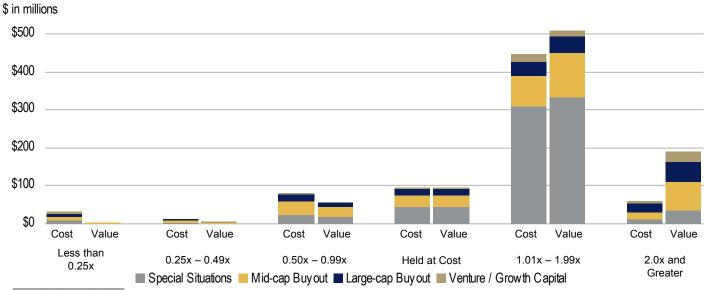

Valuation Method (% of Fair Value)

The NAV per Share of \$14.39 was \$0.14 higher than previously reported in the March Monthly NAV estimate, principally due to the receipt of additional valuation information after 9 April 2015, the publication date of the March Monthly NAV estimate.² As of 31 March 2015, approximately 9% of fair value was held in public securities. The top five public stock exposures are listed below as a percentage of fair value:

- Sabre Holdings Corporation (NASDAQ: SABR): 3.6% of fair value
- Freescale Semiconductor (NYSE: FSL): 1.3% of fair value
- Commscope (NASDAQ: COMM): 0.5% of fair value
- Fairmount Minerals (NYSE: FMSA): 0.3% of fair value
- InRetail Peru Corp. (BVL: INR): 0.2% of fair value

Underlying Company Performance by Asset Class and Multiple of Invested Capital Range

^{1.} Please refer to page 37 for a detailed description of the valuation policy. While some information is as of 31 December 2014, the Manager's analysis and historical experience lead the Manager to believe that this approximates fair value at 31 March 2015.

^{2.} As reported in the monthly NAV estimate the percent of private equity fair value was held: 40% in Private Funds & Directs, 3% in Credit-related Funds and 9% in publics as of 31 March 2015, 2% in Directs as of 28 February 2015, and 46% in Private Funds & Directs as of 31 December 2014.

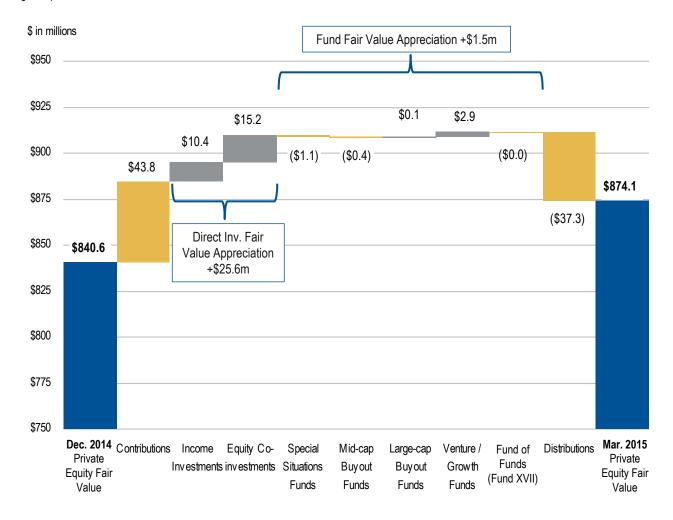

PERFORMANCE ANALYSIS

PERFORMANCE ANALYSIS

PERFORMANCE OVERVIEW

During the first quarter of 2015, the private equity fair value appreciated in value across asset classes and investment types, with the largest gains in value coming from equity co-investments and income investments. Fund investments continue to generate liquidity and distributed \$10.5 million to NBPE during the first quarter of 2015. NBPE also received approximately \$12.0 million of distributions consisting of cash interest, principal repayment and equity proceeds from income investments. During the first quarter of 2015, NBPE's gross portfolio Internal Rate of Return ("IRR") was 13.8%, driven by1:

- 23.6% gross portfolio IRR from equity co-investments
- · 13.4% gross portfolio IRR from income investments
- 2.7% gross portfolio IRR from fund investments

Note: Income investment appreciation includes equity investments completed as part of the mezzanine transaction. Income investment appreciation includes both fair value appreciation as a result of accrued cash interest as well as accrued non-cash (PIK) yield. The Company's investment performance related to the commitment to NB Crossroads Fund XVIII is presented within each respective fund asset class. Numbers may not sum due to rounding.

^{1.} Returns represent the internal rate of return ("IRR") during the first quarter of 2015 and include only investment level cash flows. Returns are before NBPE expenses, but net of underlying fees and expenses.

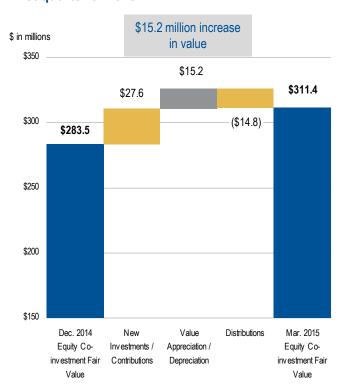

EQUITY CO-INVESTMENT PERFORMANCE

For the three month period ended 31 March 2015

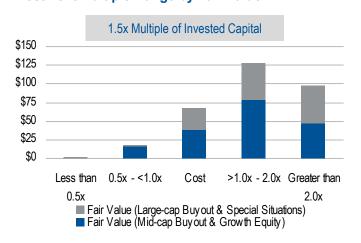

Quarterly Report

PERFORMANCE ANALYSIS

\$27.6 million of new and follow-on equity co-investment activity and a \$15.2 million increase in value during the first quarter of 2015

Investment Multiple Range by Fair Value

Equity Co-investment portfolio

During the first quarter of 2015, NBPE participated in four new equity co-investments in the industrials, technology and consumer products sectors.

The portfolio appreciated in value by \$15.2 million during the first quarter of 2015, due mainly to write-ups of several equity coinvestments, offset by declines in certain other investments. The top five investments appreciated by \$14.5 million and represented approximately 95% of the overall increase in the portfolio. Strong performance was driven by the write-ups of one 2006 and one 2007 vintage large-cap co-investment, and the write-up of a 2014 vintage equity co-investment.

NBPE received approximately \$14.8 million in distributions during the first quarter of 2015 which included proceeds from the partial realization in four investments, a dividend payout from two companies, and the sale of stock received as part consideration of the acquisition of a 2007 vintage investment.

The investment multiple range by fair value shows the dispersion of value within the equity co-investment portfolio. The majority of the private equity fair value is currently held above cost and only approximately 6% of private equity fair value was held below cost.

The average age of the equity co-investments was 2.9 years and approximately 79% of the fair value was due to investments made in 2010 or after.

Vintage Year by Fair Value

Note: Numbers may not sum due to rounding.

INCOME INVESTMENT PERFORMANCE

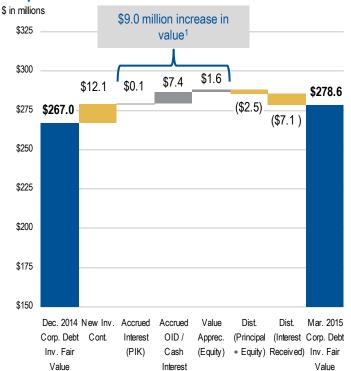

For the three month period ended 31 March 2015

Quarterly Report

PERFORMANCE ANALYSIS

\$9.0 million and \$1.3 million increase in the value of corporate private debt and healthcare credit investments, respectively. Run-rate cash income was \$29.7 million as of 31 March 2015

Corporate Private Debt¹

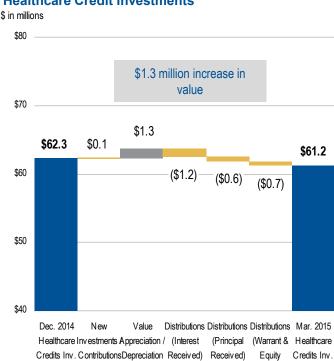

Corporate Private Debt Investment Portfolio

During the first quarter of 2015, NBPE funded approximately \$12.1 million to four corporate private debt investments. NBPE also received approximately \$9.5 million of distributions consisting of cash interest, principal repayment and equity proceeds.

The portfolio includes 29 corporate private debt investments, consisting of mezzanine investments, term loans and 2nd-lien debt

- 9.2% cash yield
- \$24.9 million of run-rate cash income
- 10.4% weighted average estimated yield to maturity
- 4.5x weighted average total leverage
- 3.1x weighted average senior leverage²
- 75% of value invested in floating rate debt³

Healthcare Credit Investments

Healthcare Credit Investment Portfolio

During the first quarter of 2015, NBPE participated in two healthcare credit investments. The two investments were in royalty credits and a second lien term loan. In the first quarter of 2015, the portfolio increased in value by \$1.3 million, driven by the write-up of one healthcare credit.

NBPE received approximately \$2.5 million in distributions consisting of cash interest, principal repayments and warrant proceeds during the first quarter of 2015.

This portfolio includes 14 healthcare credits and three royalty backed notes

- 7.8% cash vield

Fair Value

- \$4.7 million of run-rate cash income
- 9.6% weighted average estimated yield to maturity

Proceeds) Fair Value

Note: Numbers may not sum due to rounding. Cash yield calculations include \$18.9 million of value associated with equity investments and \$321.0 million of debt value.

^{1.} The mezzanine debt investments include equity investments completed as part of the mezzanine transaction.

^{2.} Based on the net leverage that is senior to the security held by NBPE.

^{3.} Based on the fair value of the debt only and excludes the fair value of equity investments and warrants.

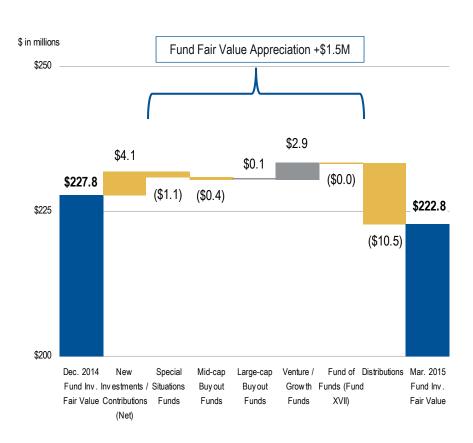

FUND PORTFOLIO INVESTMENT PERFORMANCE

For the three month period ended 31 March 2015

Quarterly Report

PERFORMANCE ANALYSIS

\$1.5 million appreciation in value of the fund investment portfolio

Fund Portfolio Investment Performance

During the first quarter of 2015, the three largest fund value drivers, measured in terms of dollar appreciation, were all venture / growth funds. While the other fund portfolios slightly decreased in value during the quarter, the Manager believes that funds are still benefiting from the healthy economic environment, strong governance and resulting robust operating performance.

Excluding investment cash flow activity, during the first quarter of 2015, the top ten fund value drivers had a combined fair value appreciation of \$4.3 million. The top ten negative drivers had a combined depreciation in fair value of \$3.3 million. The remaining 15 funds had a combined fair value appreciation of \$0.5 million.

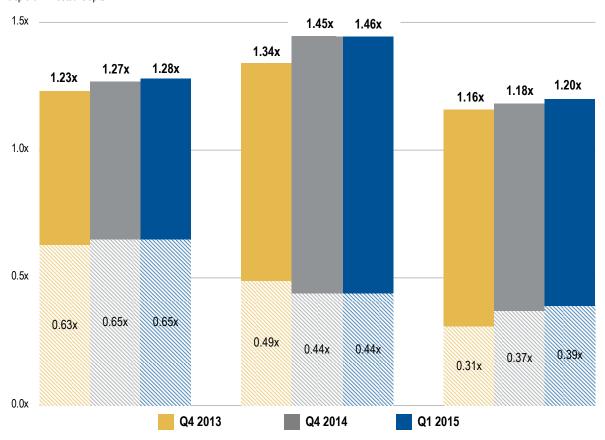

PERFORMANCE SINCE INCEPTION¹

PERFORMANCE ANALYSIS

The Manager believes NBPE has generated strong performance since inception and a significant amount of invested capital has been returned to the Company through distributions from its portfolio of private equity investments

Since inception, including realized investments and based on the multiple of total value to paid-in capital ("TVPI"), NBPE's total portfolio has generated a 1.28x gross TVPI multiple. During the first quarter of 2015, the portfolio increased in value; however, valuation increases across the portfolio were offset by the funding of new investments, which were held at cost. NBPE has received cash distributions from its portfolio of private equity investments of approximately \$808.8 million. The equity co-investments are held at a 1.46x gross TVPI multiple and NBPE has received total distributions of \$136.5 million, or 44% of paid-in capital, through sales, recapitalisations and dividends. As of 31 March 2015, the income investments were held at a 1.20x gross TVPI multiple and NBPE has received total distributions of \$161.7 million, or 39% of paid-in capital, through sales, cash interest and principal repayments.

Multiple of Invested Capital

	Total Portfolio	Equity Co-investments	Income Investments
Fair Value at 31 March 2015	\$874.1m	\$311.4m	\$339.9m
Cash Distributions received since Inception	\$808.8m	\$136.5m	\$161.7m

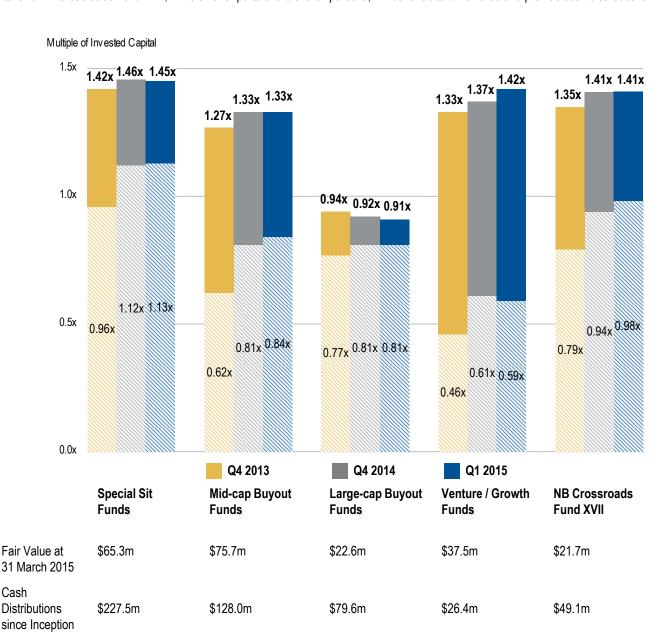

Note: Dashed bars represent distributed to paid-in capital. Total distributions exclude Strategic Asset Sale proceeds of \$100.5 million. Numbers may not sum due to rounding.

PERFORMANCE SINCE INCEPTION¹

PERFORMANCE ANALYSIS

Mid-cap buyout and special situations funds continue to generate gains

Mid-cap buyout funds, the largest asset class by fair value within the fund portfolio, have generated a gross TVPI multiple of 1.33x and NBPE has received approximately \$128.0 million in distributions, or 84% of paid-in capital. Special situations funds, the second largest asset class within the fund portfolio, have generated a gross TVPI multiple of 1.45x. NBPE has received cash distributions of approximately \$227.5 million, or 113% of paid-in capital, driven by the monetization of credit positions by underlying managers. The Manager expects cash distribution activity to continue over the coming quarters within this asset class. The Manager believes the remaining fund asset classes, including large-cap buyout, venture / growth capital and NB Crossroads Fund XVII, while smaller parts of the overall portfolio, will continue to drive value and provide cash distributions.

Note: Dashed bars represent distributed to paid in capital. Total distributions exclude Strategic Asset Sale proceeds of \$100.5 million. NBPE's performance related to the commitment to NB Crossroads Fund XVIII is presented within each respective fund asset class. Numbers may not sum due to rounding.

FUND PORTFOLIO LIQUIDITY & CASH FLOW

For the three month period ended 31 March 2015

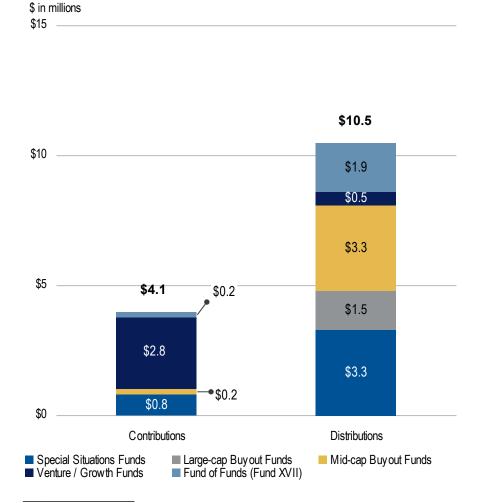

Quarterly Report

PERFORMANCE ANALYSIS

Liquidity events and IPO activity during the first quarter of 2015

- Within NBPE's portfolio, 61 companies completed liquidity events, leading to \$37.3 million of distributions to NBPE
- 4 companies in NBPE's portfolio, representing \$0.9 million of unrealized value, completed IPOs during the first quarter of 2015, which may lead to future distributions to NBPE:
 - Box, Inc. (NYSE: BOX) NB Crossroads Fund XVII
 - Eltel AB (publ) (Stockholm: ELTEL.ST) NB Crossroads Fund XVIII
 - Entellus Medical, Inc. (NasdaqGM: ENTL) NB Crossroads Fund XVIII
 - Zosano Pharma Corporation (NasdaqCM: ZSAN) NB Crossroads Fund XVIII and NB Crossroads Fund XVIII

Fund capital call activity continues to slow while distribution activity from NBPE's mature funds remains strong

The Fund portfolio's capital call activity has decreased as the portfolio matures. During the first quarter of 2015, venture/growth funds experienced the most capital call activity. NBPE also funded \$0.8 million to special situations funds.

NBPE received \$3.3 million in distributions from special situations funds during the first quarter of 2015. NBPE also received \$4.8 million from buyout funds as managers focus on harvesting portfolio companies and returning cash.

During the first quarter of 2015, the largest fund distributions were received from NB Crossroads Fund XVIII, NB Crossroads Fund XVIII, and Platinum Equity II.

The Manager expects distribution activity in the fund portfolio to continue over the next several years as underlying managers focus on liquidity.

Note: Numbers may not sum due to rounding.

UNFUNDED COMMITMENTS

For the three month period ended 31 March 2015 Quarterly Report

UNFUNDED COMMITMENTS

Favourable capital position for new investments

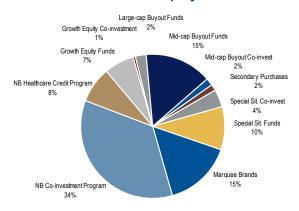

As of 31 March 2015, NBPE's unfunded commitments were approximately \$130.4 million. Approximately \$46.0 million and \$10.6 million were unfunded commitments to the NB Alternatives Coinvestment and Healthcare Credit Programs, respectively. Approximately \$13.9 million of unfunded commitments were to fund of funds managed by NB Alternatives and \$32.2 million of unfunded commitments were to third party direct funds. Within the fund portfolio, \$25.6 million of the unfunded commitments are to funds past their investment period. The Manager believes a portion of this amount is unlikely to be called. However, some amount may be called for fees, expenses and / or follow-on investments.

Unfunded commitments are primarily to the NB Alternatives Co-investment, Healthcare Credit Program and Marquee Brands. The Manager expects capital to be called in future quarters to fund new direct investments. Approximately 35% of the unfunded commitments were to the fund portfolio, with large unfunded commitments to special situations and mid-cap buyout funds. However, unfunded amounts to special situations funds were to funds which were all past their investment period. Approximately 95% of the unfunded commitments to mid-cap buyout funds were to funds past their investment period. Approximately 7% of the unfunded commitments were to growth equity funds; capital deployment by underlying managers within this asset class is typically prolonged.

The Manager analysed the unfunded commitments on an adjusted basis. Unfunded commitments were adjusted lower by removing unfunded commitments past their investment period and unfunded commitments to fund of funds managed by NB Alternatives. Following these adjustments, the unfunded commitments would be \$91.0 million. On an adjusted basis this would correspond to excess capital resources of \$18.4 million and a commitment coverage ratio of 120%.

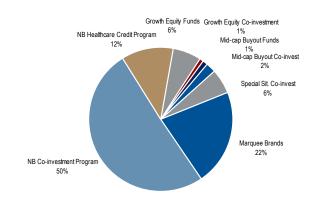

\$ in millions \$140 \$130.4 Adjusted Unfunded \$120 Commitments \$27.8 \$100 \$91.0 \$25 6 \$80 \$27.8 \$20.5 \$60 \$6.6 \$10.6 \$10.6 \$40 \$46.0 \$46.0 \$20 \$0 Unfunded Private Equity Commitments Adjusted Private Equity Unfunded Commitments NB Co-investment Program NB Healthcare Credit Program Fund Investments Fund Investments (Expired Investment Period) (Active Investment Period) Other Direct Investments

Actual Unfunded Private Equity Commitments

Note: Numbers may not sum due to rounding.

Adjusted Unfunded Private Equity Commitments

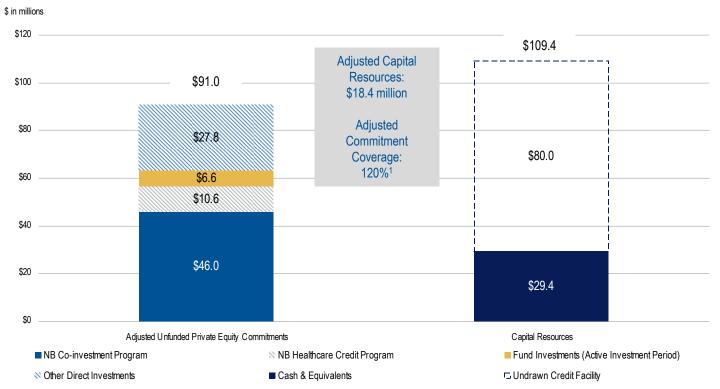

LIQUIDITY & CAPITAL RESOURCES

For the three month period ended 31 March 2015 **Quarterly Report**

LIQUIDITY & CAPITAL RESOURCES

Adjusted capital resources of \$18.4 million and \$80 million of credit facility undrawn as of 31 March 2015¹

Credit Facility

In December 2012, the Company entered into an agreement with Lloyds Banking Group regarding a senior secured revolving credit facility of up to \$200.0 million. Under the terms of the agreement, the Company may borrow, repay and re-borrow to fund private equity contributions and working capital requirements throughout the term expiring in April 2017. All borrowings under the credit facility bear interest at a floating rate and are tiered based on loan value, calculated as LIBOR or Euribor, as appropriate:

- LIBOR / Euribor + 280 bps for loan value less than or equal to \$65 million
- LIBOR / Euribor + 330 bps for loan value in excess of \$65 million and less than or equal to \$150 million
- LIBOR / Euribor + 365 bps for loan value in excess of \$150 million

The Company is also required to pay a non-utilization fee calculated as 80 basis points per annum on the daily balance of the unused amount of the credit facility.

The key financial covenant for NBPE's credit facility is a maximum debt to value ratio of 50.0%. The debt to value ratio is calculated as total debt and current liabilities divided by Restricted NAV, with Restricted NAV defined as the fair value of all private equity investments (less any excluded value) plus cash and cash equivalents. At 31 March 2015, the debt to value ratio was 14.6%.

The two other covenants are a secured asset ratio and a commitment ratio. The secured asset ratio is not to exceed 80.0% and is defined as total debt and current liabilities divided by Secured Assets, with Secured Assets defined as the value of secured private equity investments plus cash and cash equivalents. At 31 March 2015, the secured asset ratio was 20.6%.

The commitment ratio is defined as Restricted Total Exposure divided by the aggregate of Shareholder's equity and the total amount of the credit facility, with Restricted Total Exposure defined as the value of private equity investments (less any excluded value) plus unfunded private equity commitments. If the debt to value ratio is greater than 25.0% and the commitment ratio is greater than 130.0%, then the Company becomes restricted from making new private equity investments. At 31 March 2015, the commitment ratio was 111.3%.

Note: Numbers may not sum due to rounding.

^{1.} Actual unfunded commitments are \$130.4 million, corresponding to an actual over commitment of \$21.0 million and a commitment coverage ratio of 84%. See page 28 for detail on the adjustments to unfunded commitments.

MARKET COMMENTARY

For the three month period ended 31 March 2015

Quarterly Report

MARKET COMMENTARY

After a strong year in 2014, equity markets cooled off slightly during the first quarter of 2015. With periods of elevated volatility, global equity markets finished the quarter barely in positive territory. The S&P 500 gained 0.4% during the first quarter and the MSCI World Index gained 1.8% and while growth was still positive, it remains slower than 2014. Emerging markets, as measured by the MSCI Emerging Markets Index, have recovered from the 4.6% declines in 2014 and posted a 1.9% gain during the first quarter of 2015. In terms of the bond market, the U.S. High Yield and Corporate Investment Grade Indices posted strong gains versus the aggregate bond index. The U.S. Corporate Investment Grade Index increased 2.3% during the first quarter of 2015, while the U.S. High Yield Index posted similar returns of 2.5% for the quarter. The Aggregate Bond Index experienced a more moderate increase during the guarter of 1.2%.

As expected, the Federal Open Market Committee removed the word "patient" from its forward guidance in March 2015. Federal Reserve Chair Janet Yellen and the FOMC said that the first rate hike is unlikely to occur at the next April meeting and the ultimate timing will depend on further improvement in the U.S. labor markets and inflation returning to its 2% target over the medium term. While the Federal Reserve left the timing of an interest rate increase open, it was generally expected that interest rates would remain accommodative through at least the summer of 2015.

Economic activity in the U.S. continued to show generally positive results during the beginning of 2015; however, with oil prices hovering around \$50 per barrel, the energy industry continues to draw a significant amount of attention. After experiencing price levels exceeding \$100 per barrel during 2014, the price of oil fell below \$50 per barrel during the first part of 2015. Although the price has somewhat stabilized, the sharp decline in oil prices has investors concerned over energy sector assets and how the large decline in oil prices could impact other parts of the economy. Nevertheless, the S&P 500 Consumer Discretionary and Consumer Staples Sector Indices both increased over 4% during the first quarter of 2015, suggesting that the market believes consumers should benefit from lower energy prices over time.

Similarly to U.S. equity markets, global equity markets are experiencing ongoing volatility as Greece and China provide new sources of concerns for investors. By the end of 2014, pressure was mounting for a response from the ECB to combat low inflation. ECB president Mario Draghi reinforced the quantitative easing program that began in March 2015 will continue through the Fall of 2016, and until inflation runs close to 2% over the medium-term. However, Greek debt is once again a concern due to a large payment to the IMF due in May. Slower growth in China has also weighed on investors. With lagging growth in many regions, it remains to be seen whether 2015 will show continued strong growth as was expected in prior years.

Private Equity Buyout Market

Private equity buyers had significant capital to invest as robust fundraising activities continued. In addition, credit was readily available and many companies have demonstrated strong performance over the last few years. Companies with strong growth profiles, high free cash flow and more predictable business models insulated from broad macroeconomic trends attracted premium multiples. In addition, active competition from cash-rich strategic acquirers and private equity firms, combined with ample credit availability, kept transaction valuation multiples at elevated levels, particularly for larger transactions. Strong M&A and generally receptive IPO markets created many selling opportunities for private equity firms seeking exits for portfolio companies. The Manager believes this environment was advantageous for NBPE's portfolio during the first quarter of 2015.

U.S. leveraged buyout volume was \$42.6 billion in the first quarter of 2015, which was up 49% from the previous quarter, but up only 2.0% from the same quarter in 2014. The Manager believes the buyout market remains healthy and year to date activity remains strong. Large-cap transactions (defined by S&P as companies with enterprise values above \$500 million) continued to be the largest contributor to volume, representing slightly over 80% of buyout volume in the first quarter of 2015.

Valuations remained at elevated levels. Average purchase price multiples rose to 9.9x EBITDA in the first quarter of 2015, up slightly from a 9.8x EBITDA average in 2014. Equity contributions as a percentage of the capital structure increased to 39.4% in the first quarter of 2015, up from 37.3% in 2014.

Buyouts of middle market companies, defined as companies with less than \$50 million in EBITDA, continued to be more conservatively capitalized than large-cap transactions. Equity contributions for mid-cap buyouts during the first quarter of 2015 were 43.1%, or approximately 4.5% higher than large-cap transactions. The higher equity level in the mid-cap market is in part the result of less transparent credit markets for smaller transactions as well as generally less reliance on financial leverage to create returns. Although many segments of the private equity market remain competitive, the Manager believes a favourable opportunity exists in the small and mid-cap buyout markets. Given the lower absolute leverage levels employed in the small- to mid-cap market, co-investors have frequently been utilized to fund the equity portion of these transactions.

In Europe, the UK, Switzerland, and France were the most active countries by total LBO volume and the average purchase price multiple for all LBOs was 9.7x EBITDA in the first quarter of 2015.³ While multiples remained elevated relative to prior years, the Manager believes the executed transactions involved stable businesses with healthy cash flows which generally justify a higher valuation.

MARKET COMMENTARY

For the three month period ended 31 March 2015 Quarterly Report

MARKET COMMENTARY

Debt Markets

The leverage loan markets slowed down materially in the first quarter of 2015 with primary market volume down ~50% compared to the same period in 2014. OCC and Federal Reserve supervised arrangers are under intense regulatory pressure to only lead loans that satisfy certain stipulated criteria. The underwriting window, as a result, is narrower than it would normally be at this point in the cycle, dampening volume, particularly on opportunistic issues. We believe the increased regulatory scrutiny applied to the lending practices of the commercial and investment banks are favorable to asset managers and present attractive investment opportunities for NBPE.

Private equity managers continue to be very active in the credit markets, and there were 31 LBO transactions completed in Q1 2015 compared to 36 completed in the prior year period. The average leverage for U.S. middle market buyout transactions was at 4.9x in the first quarter, which was below the average of 5.3x for 2014. Equity contributions for transactions have remained well north of 40% since 2008 demonstrating continued support from sponsors. Default rates remain low, indicating that portfolio company performance remains stable and a majority of lenders expect stable to improved company performance in 2015.

Fundraising Environment

The fundraising environment in the first quarter of 2015 was robust with approximately \$38.6 billion raised in the U.S. buyout market, of which approximately \$12.7 billion was raised by funds with a fund size under \$2.5 billion.1 This fundraising activity represents an increase of over 36% relative to amounts raised in the U.S. buyout market during the same period in 2014. However, the Manager believes the majority of this capital was limited to a relatively small number of large traditional buyout funds with strong prior fund track records. In Europe, during the first quarter of 2015, approximately \$11.4 billion was raised in the buyout market, of which approximately \$4.4 billion was raised by managers with a fund size under \$2.5 billion.¹

^{1.} Thomson Reuters through 31 March 2015. Excludes venture, mezzanine, fund of funds, and secondary fundraising.

Appendix: Certain Information

For the three month period ended 31 March 2015 Quarterly Report

CERTAIN INFORMATION & MATERIAL CONTRACTS

Certain Information

The Company is subject to The Netherlands Financial Supervision Act (Wet op het financieel toezicht, "Wft"), as a listed entity (uitgevende instelling) as defined in section 1:1 of the Wft. The Company is subject to certain ongoing requirements under the Wft, the Decree on Supervision of Conduct by Financial Enterprises (Besluit Gedragstoezicht financiële ondernemingen Wft) and the Decree on the Implementation Directive Transparency Issuing Entities (Besluit uitvoeringsrichtlijn transparantie uitgevende instellingen Wft) relating to the disclosure of certain information to investors, including the publication of the Company's financial statements.

Investment Management and Services Agreement

NBPE, NB PEP Investments LP (Incorporated) and the Investment Manager entered into an Investment Management and Services Agreement on 25 July 2007 (as amended and restated on 25 January 2008), whereby the Investment Manager, subject to the overall supervision of the Directors of NBPE, was appointed as NBPE's Investment Manager.

Administration Agreement & Limited Partnership Agreement

NBPE and Heritage International Fund Managers Limited entered into an Administration Agreement on 3 July 2007 (as amended by side letter on 22 September 2009), whereby NBPE appointed Heritage International Fund Managers Limited to act as administrator and company secretary to NBPE. NBPE, as general partner, and NB PEP Associates LP (Incorporated), as special limited partner, entered into the Limited Partnership Agreement of NB PEP Investments LP (Incorporated) on 25 July 2007, as amended and restated on 16 July 2008.

Share Buy-Back Agreement

NBPE is party to a Share Buy-Back Agreement with Jefferies International Limited ("JIL") in relation to the market repurchases of Class A Shares on behalf of NBPE. The Share Buy-Back Agreement was initially entered into between NBPE and The Royal Bank of Scotland N.V. (London Branch) ("RBS N.V.") on 22 October 2010 and was subsequently amended and extended on 30 August 2011, novated on 7 November 2011 from RBS N.V. to The Royal Bank of Scotland plc ("RBS plc") in respect of repurchases of Shares made on the Specialist Fund Market only, and extended on 29 November 2011. The Share Buy-Back Agreement was then novated by RBS NV and RBS plc to JIL on 1 March 2012 and the Board of Directors has approved an extension of the Share Buyback Program until 31 August 2015. The documentation for such extension is currently in process.

Change of Control

There are no agreements that the Company considers significant and to which the Company is party that would take effect, alter or terminate upon change of control of the Company following a takeover bid.

RISK MANAGEMENT

Risk Report

The Company is subject to a number of risk factors and include, but are not limited to, those identified on the following pages throughout the risk report. The Directors seek to appropriately manage, but not eliminate risk, through the identification and control of risks; therefore there is only a reasonable assurance against fraud, misstatements or losses to the Company. The following pages summarize some, but not all, of the risks to the Company's business, how the Company controls risks, as well as risk factors related to investing in the Company's Class A and ZDP Shares.

Control Objective	Perceived Risk	Key Controls
External Risks: Market Economic Interest rates Reputation Regulatory	 Health of financial markets General economic conditions Changes in interest rates Reputational risks Changes to regulations which impact the Company 	 Investing in assets which offer the best risk / return profiles Extensive due diligence Majority of the income portfolio in floating rate debt In-house and external legal counsel monitoring key regulatory developments
Strategic Risks: Meeting business plan / objectives Share price discount to NAV Managing communication	 Ability to meet key investment level targets Building income investment portfolio to sustain dividend from the cash income Persistent trading discount of Share price to NAV Information flow to markets 	 Quarterly board meetings to review and adjust business and investment strategy as necessary Monitoring of the investment portfolio Dividend policy to the benefit of Shareholders; option to repurchase Shares Regular and timely reporting of performance
Investment Risks: Investment decisions Investment performance Exit decisions Valuation of investments Performance of the portfolio	 Finding suitable investment opportunities Investment underwriting Achieving investment returns and finding exit opportunities Reported NAV / valuation of investments vs. liquidated cash value Generating NAV outperformance relative to benchmarks 	 Extensive due diligence and investment process Reasonable assumptions used in underwriting Seeking investments with shorter duration and clear exit paths Robust and consistent valuation process and reported NAV updates on a monthly basis
Financial Risks: Liquidity management Credit facility ZDP Liability Foreign exchange	 Cash needs to fund investments and ongoing business operations Maintaining appropriate debt levels and complying with financial covenants Meeting final capital entitlement of ZDP Shares Foreign exchange exposure 	 Cash flow forecasting and return modeling to project future cash needs Monitoring of financial ratios and covenant headroom Forward currency contract to hedge, in part, currency exposure
Operational Risks: Key professionals IT Systems Compliance	 Attracting and retaining key business and investment professionals Alignment of incentives Maintaining systems and infrastructure to achieve business objectives Regulatory compliance 	 Resources of Neuberger Berman for attracting and retaining talent Policies and procedures for all professionals of the Investment Manager and the Administrator IT infrastructure and systems maintained by the Investment Manager and the Administrator Significant levels of internal controls and monitoring by compliance departments within the Investment Manager and the Administrator

Quarterly Report

RISK MANAGEMENT (CONT.)

External Risks

External risks are those risks that are largely outside the Company's control but which could nevertheless impact the valuation of the Company's investments. These risks are difficult to quantify, are uncertain in nature, and the overall impact to the Company could vary depending on the degree of these external risks. For example, the operating performance of the companies within the investment portfolio are generally tied to overall economic conditions and if economic conditions worsened the financial performance of some or all of the companies within the investment portfolio could be negatively impacted. In addition, there is a significant amount of investments deployed in private corporate sector private debt investments and healthcare credit investments. A sustained rise in the level of interest rates could impact the value of some or all of these investments. However, the Directors believe having a meaningful amount invested in floating versus fixed rate debt helps to mitigate this risk.

The Company must comply with numerous regulations across multiple jurisdictions. Changes to regulations may require additional actions or procedures for the Company to take, which could result in additional costs to the business. For example, the Directors are monitoring the implementation of the Alternative Investment Fund Managers Directive in Europe closely and this continues to be a key regulation that could impact the Company in future quarters. The Company also relies on the resources of the Investment Manager, external counsel and the Company's Administrator to follow and track the ongoing developments in regulation.

Strategic Risks

Strategic risks are largely risks associated with the execution and achievement of planned objectives as well as meeting key business targets. To mitigate these risks, the Investment Manager closely tracks the investments within the portfolio and monitors the portfolio relative to the planned objectives. In addition, the Directors receive updates from the Investment Manager on the performance of the portfolio at each quarterly board meeting. The board meetings also serve as a time to review and discuss the business plan and investment objectives. The current key strategic risk for the Company is meeting the required investment level within its income investment portfolio so that the Company's dividend can be fully supported from the cash income this portfolio generates.

Investment Risks

Investment risks are risks that pertain to the investments within the Company's portfolio and include investment and exit decisions, underwriting of investments, investment performance and the valuation of investments. The Investment Manager's team of investment professionals seek to manage investment risk through thorough due diligence and through diversification across asset class, vintage year, geography, industry and sponsor. Investment decisions are made by the Private Investment Portfolios Investment Committee of the Investment Manager; however, each underlying fund investment has its own set of investment professionals and committees to make investment decisions into underlying portfolio companies, outcomes of which could be positive or negative. The Private Investment Portfolios Investment Committee is comprised of eight senior investment professionals with over 220 years of combined professional experience and include a range of diverse backgrounds including as fund managers, CEOs, directors of corporate boards, direct private equity investors, bankers, lawyers and accountants. Post-investment, the Investment Manager's team of investment professionals closely monitor the investment portfolio for events or changes in performance that could justify a change in the valuation of an investment. A description of the Investment Manager's valuation policy for equity and debt investments can be found on page 37 of this report.

Financial Risks

Financial risks are risks that could impact the financing and ongoing operations of the business and include liquidity and credit facility management, meeting the final capital entitlement of the ZDP Shares in 2017 and foreign exchange risk. The Investment Manager performs analysis on the underlying portfolio by making reasonable exit assumptions on the underlying investments and forecasts the expected future cash flows from investment exits. This analysis helps the Investment Manager make a reasonable projection of the future cash and borrowing needs as well as better manage the pace of new investments in the portfolio. This analysis only provides a reasonable forecast and is relied upon only as such and actual performance could differ materially. To the extent there are any current outstanding borrowings under the credit facility, the Investment Manager closely monitors the financial ratios and covenant headroom available. The Investment Manager has entered into a forward currency contract to hedge, in part, the currency risk associated with the ZDP Shares.

For the three month period ended 31 March 2015 **Quarterly Report**

RISK MANAGEMENT (CONT.) & RISK FACTORS

Operational Risks

Operational risks pertain to the business operations of the Company. The Company's only activities are those of an investment company, and the Company itself does not have any employees. Instead, the Company relies on the investment personnel, infrastructure and resources of the Investment Manager and the Company's Administrator. For example, if the Investment Manager were unable to attract and retain the right investment and business professionals or maintain adequate IT infrastructure, the operations of the Company could be impacted. The Company does not have an internal audit or compliance function and instead relies on these functions within the Investment Manager and the Company's Administrator. Neuberger Berman is a global asset management company and has significant levels of internal controls designed to monitor and maintain compliance. In addition, Neuberger Berman has a significant set of policies and procedures for all employees, including employees of the Company's Investment Manager. Given the scale and resources available at the Investment Manager, the Board is comfortable operational risks to the Company are managed effectively.

Internal Controls

The Directors have developed a set of internal controls designed to manage, not eliminate risk, and therefore can only provide a reasonable assurance against fraud, misstatements or losses to the Company. The internal controls are based on a risk matrix that is provided on a quarterly basis by the Investment Manager to the Directors. The risk matrix outlines each of the underlying risks and risk type as well as the key controls and the responsible team for managing the risk. As risks change over time, the risk matrix is updated to effectively identify and control ongoing risks to the Company.

Risk Factors

The Company is subject to, and an investment in the Company's Class A Shares involves, substantial risks, which may adversely impact the Company's financial condition, results of operations and/or the value of your investment. Investors in the Company's Class A Shares and ZDP Shares should carefully consider such risks, which include, without limitation, those set out below and on the following page. If any such risks occur, the Company's business, financial condition, results of operations and the value of your investment would likely suffer.

The Company may experience fluctuations in its monthly NAV

The Company may experience fluctuations in NAV from month to month due to a number of factors, including changes in the values of investments, which in turn could be due to changes in values of portfolio companies, changes in the amount of distributions, dividends or interest paid in respect of investments, changes in operating expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which the Company encounters competition and general economic and market conditions. Such variability may lead to volatility in the trading price of the Class A Shares and cause the Company's results for a particular period not to be indicative of the Company's performance in a future period.

On liquidation of the Company's assets on any given day, the reported NAV may not match the liquidated cash value of such assets Where the Company is required or the Investment Manager deems it necessary to liquidate some or all of our assets on any given day, the liquidated cash value of such assets may not match the reported NAV or portion of the reported NAV (in the case that not all of the Company's assets are liquidated) attributable to such assets. Liquidation of the Company's assets will be subject to a number of factors, including the availability of purchasers of the Company's assets, liquidity and market conditions and, as such, the actual cash value of some or all of the Company's assets may differ from the latest reported NAV (or portion of the reported NAV in the case that not all of the Company's assets are liquidated).

The Shares could continue to trade at a discount to NAV

The Shares could continue to trade at a discount to NAV for a variety of reasons, including, without limitation, due to market conditions or to the extent investors undervalue the Investment Manager's investment management activities. Also, since there is generally a period of years before a new private equity fund has completed making its investments, return on the Company's investments in such funds is not likely to be realized for a substantial time period, if at all, which could negatively impact the value of the Shares. Additionally, unlike traditional private equity funds, the Company intends to continuously reinvest the cash received, except in limited circumstances (including in connection with the Company's Dividend Policy and Share Buy Back Programme). Therefore, the only way for investors to realize their investment is to sell their Shares for cash. Accordingly, in the event that a holder of Shares requires immediate liquidity, or otherwise seeks to realize the value of its investment in the Company, through a sale of Shares, the amount received by the holder upon such sale may be less than the underlying NAV of the relevant Shares sold.

For the three month period ended 31 March 2015

Quarterly Report

RISK FACTORS

The trading markets that the Class A Shares and ZDP Shares are admitted to are less liquid than certain other major exchanges, which could affect the price of the Company's shares

The principal trading markets are Euronext Amsterdam and the SFM for the Class A Shares and the SFM and the CISE for the ZDP Shares, and these markets are less liquid than certain other major exchanges in the United States and certain other parts of Europe. Because these markets are less liquid than major exchanges in the United States and certain other parts of Europe, the Company's Shareholders may face difficulty when disposing of their Shares, especially in large blocks. To date the Company's Shares have actively traded, but with generally low daily volumes. The Company cannot predict the effects on the price of the Shares if a more liquid trading market for them does not develop. In addition, if such a market does not develop, relatively small sales may have a significant negative impact on the price of the Shares. For example, sales of a significant number of Shares may be difficult to execute at a stable price.

The availability of the Company's credit facility and failure to continue to meet the financial covenants in the credit facility could have an adverse impact on liquidity

The availability of the Company's credit facility is dependent on continuing to comply with the covenants of the Company's credit facility. The Company is currently in compliance with all of the covenants of the credit facility. However, certain events, including reductions in the NAV of the investment portfolio, could result in an event of default under the credit facility agreement. Where an event of default occurs, the lender may cancel the undrawn portion of the Company's credit facility and declare the entire outstanding principal and interest immediately due. As a result, the Company may not have access to sufficient capital to meet the obligations (including unfunded commitments) and the Company could be forced to sell assets in order to cure the event of default or to repay the Company's credit facility. Where the Company is obliged to sell assets from the investment portfolio to meet the obligations under the credit facility, such sale may be at an undervalue and may not reflect the estimated unaudited fair value assigned to such asset(s). Further, where the credit facility is unavailable, the Company's ability to make new investments or to honor funding obligations to which the Company is already committed may be severely restricted. The Company may be unable, or it may not be prudent or in the Company's best interests, to enter into further agreements to borrow money or to refinance the credit facility.

The price attributed to the Class A Shares on Euronext Amsterdam and the SFM may vary significantly and the price attributed to the ZDP Shares on the SFM and the CISE may vary significantly

The Class A Shares are admitted to trading on Euronext Amsterdam and the SFM and the ZDP Shares are admitted to trading on the SFM and the CISE. The price attributed to the Class A Shares or ZDP Shares, as the case may be, may vary significantly on one exchange versus the other. As such, no guarantee is given that investors will receive best pricing and execution on one market over another. The Investment Manager and the Company accept no responsibility whatsoever with regards to the pricing of the Class A Shares and execution of trades therein on Euronext Amsterdam and the SFM, the pricing of the ZDP Shares and execution of trades therein on the SFM and the CISE, nor do the Investment Manager or the Company accept any responsibility for any pricing and/or execution variation between any of these exchanges. Investors are responsible for informing themselves as to the best pricing and execution available, in the case of the Class A Shares, on both Euronext Amsterdam and the SFM, and, in the case of the ZDP Shares, on both the SFM and the CISE.

The holders of ZDP Shares may not receive the final capital entitlement

The holders of ZDP Shares may not receive the final capital entitlement and no guarantee is made by the Company in relation to the payment thereof. The ZDP Shares, whilst ranking prior to the Class A Shares and the Class B Shares in respect of the repayment of up to 169.73 pence per ZDP Share from the assets of the investment portfolio, rank behind any borrowings of the Company that remain outstanding. In addition, upon the occurrence of significant loss in value of the assets held in the investment portfolio, the Company may be unable to pay the final capital entitlement or any part thereof to the holders of ZDP Shares.

Payment of the final capital entitlement to the holders of ZDP Shares may be dilutive to the NAV per Class A Share

Payment of the final capital entitlement to the holders of the ZDP Shares may be dilutive to the NAV per Class A Share. Where the Company does not generate investment returns in excess of the forecast gross redemption yield of 7.30% (in relation to which, no guarantee has been given) per annum (based on the issue price of the ZDP Shares), the NAV per Class A Share may be significantly diluted.

Appendix: VALUATION METHODOLOGY

For the three month period ended 31 March 2015

Quarterly Report

VALUATION METHODOLOGY

Equity

We carry our private equity investments on our books at fair value using the best information we have reasonably available to determine or estimate fair value. Publicly traded securities are valued based on quoted prices as of the last day of the relevant period less discounts to reflect legal restrictions associated with the securities, if any, that affect marketability. We determine such values for publicly traded securities held directly as well as known public positions held in the underlying private equity investments on a look-through basis. We estimate fair value for private interests based on a methodology that begins with the most recent information available from the general partner of the underlying fund or the lead investor of a direct co-investment, and considers subsequent transactions, such as drawdowns or distributions, as well as other information judged to be reliable that reports or indicates valuation changes, including realizations and other portfolio company events. We proactively re-value our investments before we have received updated information from the fund manager or lead sponsor if we become aware of material events that justify a change in valuation. If we conclude that it is probable that we will sell an investment, we adjust our carrying value to the amount we expect to realize from the sale, exclusive of transaction costs.

Debt

We estimate the enterprise value of each portfolio company and compare such amount to the total amount of the company's debt as well as the level of debt senior to our interest. Estimates of enterprise value are based on a specific measure (such as EBITDA, free cash flow, net income, book value or NAV) believed to be most relevant for the given company and compares this metric in relation to comparable company valuations (market trading and transactions) based on the same metric. In determining the enterprise value, we will further consider the companies' acquisition price, credit metrics, historical and projected operational and financial performance, liquidity as well as industry trends, general economic conditions, scale and competitive advantages along with other factors deemed relevant. Valuation adjustments are made if estimated enterprise value does not support the value of the debt security we are invested in and securities senior to our position.

If the principal repayment of debt and any accrued interest is supported by the enterprise value analysis described above, we will next consider current market conditions including pricing quotations for the same security and yields for similar investments. To the extent market quotations for the security are available, we will take into account current pricing and liquidity. Liquidity may be estimated by the spread between bid and offer prices and other available measures of market liquidity, including number and size of recent trades and liquidity scores. If we believe market yields for similar investments have changed substantially since the pricing of our security, we will perform a discounted cash flow analysis, based on the expected future cash flows of the debt securities and current market rates. We will also consider the maturity of the investment, compliance with covenants and ability to pay cash interest when estimating the fair value of our debt investment.

Appendix: FORWARD LOOKING STATEMENTS

For the three month period ended 31 March 2015

Quarterly Report

This report contains certain forward-looking statements. Forward-looking statements speak only as of the date of the document in which they are made and relate to expectations, beliefs, projections (including anticipated economic performance and financial condition), future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts and are subject to risks and uncertainties including, but not limited to, statements as to:

- Our future operating results;
- Our business prospects and the prospects of our investments:
- The impact of investments that we expect to make;
- The dependence of our future success on the general economy and its impact on the industries in which we invest:
- The ability of our investments to achieve their objectives;
- Differences between our investment objective and the investment objectives of the private equity funds in which we invest;
- The rate at which we deploy our capital in private equity investments, co-investments and opportunistic investments;
- Our expected financings and investments;
- The continuation of the Investment Manager as our service provider and the continued affiliation with the Investment Manager of its key investment professionals;
- The adequacy of our cash resources and working capital; and
- The timing of cash flows, if any, from the operations of our underlying private equity funds and our underlying portfolio companies.

In some cases, forward-looking statements may be identified by terms such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan," "potential," "should," "will," and "would," or the negative of those terms or other comparable terminology.

The forward-looking statements are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to us or are within our control. If a change occurs, our business. financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. Factors and events that could cause our business, financial condition, liquidity and results of operations to vary materially include, among other things, general economic conditions, securities market conditions, private equity market conditions, the level and volatility of interest rates and equity prices, competitive conditions, liquidity of global markets, international and regional political conditions, regulatory and legislative developments, monetary and fiscal policy, investor sentiment, availability and cost of capital, technological changes and events, outcome of legal proceedings, changes in currency values, inflation, credit ratings and the size, volume and timing of transactions, as well as other risks described elsewhere in this report and our prospectus relating to our IPO and our prospectus relating to our ZDP Shares.

The foregoing is not a comprehensive list of the risks and uncertainties to which we are subject. Except as required by applicable law, we undertake no obligation to update or revise any forward-looking statements to reflect any change in our expectations, or any changes in events, conditions or circumstances on which the forward-looking statement is based. In light of these risks, uncertainties and assumptions, the events described by our forward-looking statements might not occur. We qualify any and all of our forward-looking statements by these cautionary factors.

Appendix: OVERVIEW OF THE INVESTMENT MANAGER

For the three month period ended 31 March 2015

Quarterly Report

About NB Alternatives

The NB Alternatives group of Neuberger Berman has 28 years of investing experience specializing in co-investments, direct-yielding investments, private equity funds and secondary investments and has built relationships with leading private equity fund managers over that time.

The Investment Manager makes all of the Company's investment decisions, and the Board of Director's of the Company have delegated to the Investment Manager the day-to-day management and operations of the Company's business. The Investment Manager's investment decisions are made by its Investment Committee (the "Investment Committee"), which currently consists of eight members with over 220 years of professional experience. The sourcing and evaluation of the Company's investments is conducted by the Investment Manager's team of over 70 investment professionals who specialize in co-investments, direct-yielding investments and fund investments. In addition, the Investment Manager's staff of approximately 130 administrative and finance professionals are responsible for the Company's administrative, financial management and reporting needs. The Investment Manager currently maintains offices in New York, London, Dallas, Hong Kong and Bogotá.

About Neuberger Berman

Neuberger Berman, founded in 1939, is a private, independent, employee-owned investment manager. The firm manages equities, fixed income, private equity and hedge fund portfolios for institutions and advisors worldwide. With offices in 18 countries, Neuberger Berman's team is more than 2,100 professionals and the company was named by Pensions & Investments as a 2013 and 2014 Best Place to Work in Money Management. Tenured, stable and long-term in focus, the firm fosters an investment culture of fundamental research and independent thinking. It manages \$251 billion in client assets as of March 31, 2015. For more information, please visit our website at www.nb.com.
