## Update from the Manager

The ongoing pandemic and resulting economic shock have had a devastating effect around the world. It will be some time before the full social and economic impact can be assessed and much will depend on how this virus is combatted in the coming months.

Most companies, public and private, have been and are being affected by the current situation and the ultimate impact on each company will be determined by the duration and severity of the ongoing economic downturn, the nature and speed of the recovery, the lingering behavioral changes which may stem from COVID-19 and the actions that management teams and owners take to optimise their companies for these variables. NBPE has a well diversified portfolio and owns stakes in companies whose lead GPs are experienced, well-resourced and who are focused on making sure that their portfolio companies can survive through a severe and possibly protracted recession. Examples of steps they have taken and remain focused on include:

- Ensuring there is appropriate cash and liquidity
- Implementing hiring freezes and cost reduction plans
- Working with lenders on capital structure matters
- Reviewing capital spending plans and postponing discretionary spending
- Working through reserve requirements to be able to support their companies with capital injections and for accretive add on acquisitions
- Working with portfolio companies on supply disruptions
- Working with portfolio companies on their respective technology and human resources needs, so that their companies can work and execute effectively while mobility is restricted

The first quarter valuations in this report reflect the initial impact of this crisis on the portfolio and resulted in a NAV per Share total return for the first quarter of (10.5%). While NBPE's share price discount widened significantly in March and remains wide compared to historical averages, we have been impressed with

the speed and focus with which GPs have reacted to this crisis and believe this positions NBPE's portfolio as well as possible for the future.

Importantly, as a direct private equity fund, NBPE has the ability to stop its direct investment program when necessary. As a result of this, together with the increased, long term credit facility with MassMutual we believe that NBPE has ample liquidity and balance sheet resilience to weather a long downturn. We believe the positioning of the portfolio prior to the onset of the pandemic will serve NBPE well and that the company's capital position is strong.

We intend to provide a detailed portfolio update presentation and host an investor update call in the coming weeks, which will give additional details regarding portfolio performance and positioning and we look forward to updating you further then.

## Company Overview

88% of fair value invested in direct equity of private equity backed companies

NBPE offers direct exposure to a diversified portfolio of private equity investments alongside high quality sponsors with an extra layer of due diligence through Neuberger Berman Private Equity's global investment team and processes. NBPE leverages the deep network of private equity relationships, deal flow and investment expertise of the private equity professionals of Neuberger Berman's \$90<sup>1</sup> billion private equity platform. The Company invests across a variety of situations including new buyouts and "mid-life" transactions, which are investments into existing private equity sponsor portfolio companies, often to fund an acquisition or to provide partial liquidity to investors.

By leveraging the capabilities of the Neuberger Berman Private Equity platform, the Company seeks exposure to a broad set of private equity managers and companies and provides investors in the Company access which is more typically achieved by large-scale institutional investors with the ability to invest across a wide-range of the private equity universe. The current portfolio includes over 100 direct equity investments made alongside over 60 leading private equity sponsors and represents 88% of the portfolio's fair value, of which approximately 96% of the direct investments have no management fees or carried interest payable to third party GPs. In addition, NBPE seeks diversification in its equity portfolio across geography, industry, enterprise value, and vintage.

Furthermore, NBPE's investment strategy is executed on a fee-efficient basis and without need for significant long-term unfunded commitments. Typically, co-investments are made on a no management fee and no carried interest basis, resulting in only a single layer of fees, as opposed to the additional management fees or carried interest payable to third party GPs.

**NBPE's objective is to give investors access to high quality private equity investments and industry leading sponsors, in a fee efficient portfolio, all through one share.**

Since NBPE is a direct investor operating without third party fund investments, it is able to efficiently manage its capital deployment without significant long-term unfunded commitments, which is advantageous to its balance sheet management.

1. As of 31 March 2020. Represents aggregate committed capital since inception in 1987, including commitments in the process of documentation or finalisation.

# NB Private Equity Partners Limited

## Investment Type

### Weighted to Direct Equity Investments

The portfolio is weighted to direct equity investments, and 10% of the portfolio is in income investments. Fund investments now represent only 2% of private equity fair value.

## Geography

### Weighted to North America

NBPE's portfolio is weighted to North American investments. This is the largest private equity market globally and the Manager believes the overall dynamics in this market relative to other geographies have generally offered the most attractive investment opportunities. The Manager is constantly monitoring and evaluating markets globally and may adjust this strategy over time. Approximately 23% of NBPE's portfolio is invested in European companies and 4% in other parts of the world, primarily Asia and Latin America.

Note: Numbers may not sum due to rounding.

# NB Private Equity Partners Limited

## Industry

### Broadly diversified across industries

NBPE's portfolio is broadly diversified across industries. The Manager does not set specific industry targets, because the Manager believes this could lead to selecting sub-optimal investments to meet a target. Instead the Manager looks for companies backed by high quality sponsors with favourable business characteristics in favoured sectors that the Manager believes can grow faster than gross domestic product.

## Year of Investment

### Diversified by vintage year, with limited exposure to older vintages

Approximately 94% of the portfolio fair value relates to investments made since the beginning of 2014 and the portfolio has a limited exposure to older vintages.

Note: Numbers may not sum due to rounding.

# NB Private Equity Partners Limited

## Portfolio & Performance

As of 31 March 2020, approximately 98% of the private equity fair value was invested in direct equity and income investments. The portfolio has been repositioned away from fund investments and we expect the fund portfolio to continue to wind down organically.

Over a one year period, NBPE's portfolio generated a gross IRR of (1.5%), with valuations across the portfolio being affected by the COVID 19 pandemic.

Investment Type	% of Fair value	One Year IRR	Three Year IRR	Five Year IRR
Direct Equity Investments	87.8%	(1.4%)	10.4%	13.5%
Income Investments	10.1%	5.1%	5.1%	4.5%
Fund Investments	2.1%	(20.9%)	(1.1%)	2.0%
<b>Total Portfolio</b>	<b>100%</b>	<b>(1.5%)</b>	<b>8.6%</b>	<b>9.6%</b>

### Direct Equity Investments

During the first quarter of 2020, direct equity investments depreciated in value by \$80.8<sup>1</sup> million. The largest valuation decreases measured by Q1 2020 value depreciation – Material Handling Systems, Viant, Tandem (fka Cortefiel), GFL, and Marquee Brands – in aggregate, depreciated by \$25.9 million. The top five investments measured by Q1 2020 value appreciation – Beyond Trust, Hivory, Innovacare, Holley, and Petsmart / Chewy (NYSE: CHWY) – in aggregate, appreciated by \$10.5 million. As of 31 March 2020, approximately \$70.2 million of NBPE's direct equity portfolio fair value was held in public securities.

### Income Investments

Returns in the income portfolio were driven by a \$5.3 million realisation of NBPE's direct yielding investment in Galco as well as interest accruals from NB Credit Opportunities Program.

### Fund Investments

Fund investments are "tail-end" positions and are winding down over time. NBPE has 18 legacy fund interests remaining and during the first quarter of 2020 these funds generated \$5.8 million of realisations.

<sup>1</sup> 2020 value depreciation and appreciation includes new investments and does not solely represent appreciation of the 2019 investment portfolio.

PORTFOLIO REVIEW | DIRECT INVESTMENTS

31 March 2020 | Quarterly Report

## Direct Equity Investments

Made alongside leading private equity firms in their core areas of expertise

NBPE seeks to invest in high quality businesses across a variety of transaction types, including capital for new buyouts and “mid-life” transactions, where investments are made into a sponsor’s existing private equity portfolio companies. The Investment Manager’s team of professionals works alongside the general partners throughout the process and often engages with sponsors early on in a transaction. NBPE is able to leverage the deep networks of the Investment Manager’s team to invest alongside numerous private equity sponsors.

### INVEST IN NEW DEALS

#### NEW BUYOUTS

New buyouts are made alongside leading private equity firms and can be across a variety of transaction types including take-privates, buyouts of family businesses, carve-outs or divisional sales.

### CO-INVEST “MID-LIFE” INTO EXISTING PRIVATE EQUITY PORTFOLIO COMPANIES

#### ADD-ON ACQUISITIONS / GROWTH CAPITAL

Add-on or growth capital typically helps finance an existing company’s growth or M&A strategy.

## Portfolio

The direct portfolio is comprised of 104 equity investments and 15 debt investments with a fair value of \$1,018.1 million. The equity portfolio consists primarily of buyout investments and is diversified across industry, vintage year and sponsor. The portfolio includes investments with unique investment angles and the Manager seeks investments which have multiple value creation levers including: high-quality sponsors and management teams, industry growth or secular trends, growth of new markets or product offerings, operational enhancements or clear exit paths and the potential for shorter paths to liquidity. The portfolio is weighted towards buyout investments and the weighted average holding period of equity investments is 2.9 years.

## Overview of 2020 Equity Investments

During the first quarter of 2020, NBPE deployed \$56.9 million into four new equity investments in the financial services, healthcare, and consumer industries and \$1.1 million to follow-on investments. Over a one year period, the direct equity portfolio generated a gross IRR of (1.4%), driven by write-downs across the portfolio largely due to the COVID pandemic. In aggregate there were \$99.2 million of unrealised write-downs in the direct equity portfolio during 2020 and these write-downs were offset by \$18.4 million in unrealised write-ups.

## Company Sales and Realisations

During Q1 2020, the direct equity portfolio received distributions of \$9.0 million. The majority of realisations resulted from dividends and other cash received as partial realisations. Notably, the direct yielding portion of Galco was also fully exited in 2020 and the mezzanine debt distributed \$5.3 million during Q1 2020 and \$6.5 million over the investment's life.

## IPO Activity

In March 2020, GFL Environmental (NYSE: GFL) completed an IPO and NBPE's exposure converted into common shares. A Special Purpose Acquisition Company ("SPAC") acquired Vertiv (NYSE: VRT) in February 2020 and NBPE's exposure converted into common shares. No other IPOs happened in the first quarter of 2020.

# NB Private Equity Partners Limited

## Valuation

Following the receipt of additional valuation information after 30 April 2020, the publication date of the March monthly NAV estimate, the NAV per Share of \$16.84 was a decrease of \$1.20 from the previously reported estimate.<sup>1</sup>

NBPE carried direct equity and fund investments based on the most recently available fair value using financial information provided by the lead private equity sponsor. Debt investments made on a primary basis are generally carried at cost plus accrued interest, if any; debt investments made through secondary market trades are generally carried at market quotes, to the extent available.

### Public Valuation Information

As of 31 March 2020, approximately 7% of fair value was held in public securities. The top five public securities exposures are shown below<sup>2</sup>:

- GFL (NYSE: GFL): \$14.8 million
- SolarWinds (NYSE: SWI): \$11.4 million
- Vertiv (NYSE: VRT): \$8.3 million
- Gardner Denver (NYSE: GDI): \$7.3 million
- Evoqua (NYSE: AQUA): \$5.2 million

### Direct Equity Portfolio Valuation

The table below shows the private and public fair value and the current carrying multiple by vintage year of the direct equity portfolio. 93% of portfolio valuations are based on private information as of 31/3/2020 and the remaining 7% is based on public investments' closing share price as of 31/3/2020. The direct equity portfolio was held at a gross carrying multiple of 1.2x current cost as of 31 March 2020.

Note: Numbers may not sum due to rounding. Please refer to page 23 for a detailed description of the valuation methodology.

1. As reported in the Monthly NAV estimate.
2. Public valuation includes investments that are held indirectly.
3. Returns are presented on a "gross" basis (i.e. they do not reflect the management fees, carried interest, transaction costs and other expenses that may be paid by investors, which may be significant and may lower returns).

# NB Private Equity Partners Limited

## Unfunded Commitments

As of 31 March 2020, NBPE’s unfunded commitments were approximately \$175.3 million. Note that this does not include the impact of subsequent events prior to this release date. Of this, \$149.1 million was unfunded to NB Programs, as detailed below:

- NB Co-investment Programs: \$54.0 million
- NB Specialty Finance Program: \$42.5 million
- NB Credit Opportunities Program: \$21.5 million
- NB Renaissance Programs: \$22.0 million
- Marquee Brands: \$5.0 million
- NB Healthcare Credit Program: \$4.1 million

The remaining unfunded commitments were to legacy funds and other direct investments. The Manager believes a large portion of this amount is unlikely to be called. However, some amount may be called for fees, expenses and / or follow-on investments.

The Investment Manager analysed the unfunded commitments on an adjusted basis. In light of the changed economic outlook, the Investment Manager revised this calculation methodology to reflect a more conservative view of possible additional capital calls from underlying investments. Unfunded commitments were adjusted by removing unfunded commitments past their investment period (adjustment of \$33.2 million), except for reserves which may be called for follow-ons. Following these adjustments, the unfunded commitments were \$142.0 million as of 31 March 2020.

### Capital Resources

As of 31 March 2020, NBPE had \$149.6 million of total capital resources. On an adjusted basis, this corresponds to excess capital resources of \$7.6 million and an adjusted commitment coverage ratio of 105% as of 31 March 2020. Subsequent to this reporting period, during May 2020, the Company increased the MassMutual Credit Facility from \$250 million to \$300 million, which increases NBPE’s available capital resources by an additional \$50 million.

Note: Numbers may not sum due to rounding.

# NB Private Equity Partners Limited

## Credit Facility

### Massachusetts Mutual Life Insurance Company Credit Facility (“MassMutual Facility”)

On 23 December 2019 NBPE entered into a new ten year \$200 million credit facility (\$250 million inclusive of a \$50 million accordion) with MassMutual. On 26 March 2020, NBPE announced that the accordion feature was exercised, resulting in a facility size of \$250 million. The borrowing availability period ends on 23 December 2029. The facility is secured by a security interest in the underlying cash flows from investments. As of 31 March 2020, there was \$250.0 million borrowed under the MassMutual Facility (and a cash balance of \$149.6 million).

Under the MassMutual Facility, the interest rate was originally calculated as LIBOR plus 275 basis points per annum (287.5 basis points following the additional extension in size described below). The company is also required to pay an undrawn fee of 55 basis points per annum on any undrawn amounts. Beginning 18 months after the closing date, the facility has a minimum draw requirement (being charged at the interest rate on drawn amounts whether the funds are drawn or not). Following the increase in the facility size to \$300 million subsequent to this reporting date, the minimum draw amount was increased from \$60 million to \$90 million.

The Company is required to meet a LTV test on drawn amounts, based on anniversary dates of the MassMutual Facility. The LTV ratios are as follows: 45% through the 8<sup>th</sup> anniversary, 35% from the 8<sup>th</sup> anniversary to the 9<sup>th</sup> anniversary, 25% from the 9<sup>th</sup> anniversary to the 10<sup>th</sup> anniversary and 0% thereafter to maturity. The Company is subject to a number of diversification and portfolio concentration tests which limit the exposure the Company may have in certain areas. The Company is permitted to pay dividends, provided the Company satisfies the LTV ratio test and meets the requirements under the Facility agreement (in addition, both classes of the Company’s Zero Dividend Preference Shares require a gross asset coverage ratio relative to the Company’s liabilities of 2.75x or greater). The facility may not be terminated until the end of the availability period.

The MassMutual Facility also has a borrowing base concept. The borrowing base is the maximum amount NBPE can drawdown and is the lesser of: 30% of investment value plus cash or the total facility size.

As of 31 March 2020, the Company met all the requirements under the MassMutual Facility.

As previously noted, the Company announced that it has agreed to increase the existing credit facility by \$50 million, resulting in a total size of \$300 million as of 4 May 2020. The interest rate on the facility is now L+287.5bps (1% L Floor) on drawn amounts and the undrawn spread remains 55bps. On 29 May 2020, NBPE paid down \$125.0 million of the outstanding credit facility and as of 31 May 2020, the Company had \$125.0 million drawn from the credit facility.

## ESG

### ESG at Neuberger Berman

Neuberger Berman is highly focused on integrating environmental, social and governance (“ESG”) issues across its equity, fixed income and alternatives businesses and is continually striving to deepen its commitment to ESG integration both at the individual strategy level, and as a firm as a whole. 60% of the assets managed by Neuberger Berman consistently and demonstrably integrate ESG factors in portfolio construction and security analysis. Neuberger Berman coordinates these efforts through the ESG Committee, which is chaired by the Head of ESG Investing, Jonathan Bailey. This committee includes the firm’s President and CIO-Equities, Joe Amato, and senior representatives from across the firm including private equity. Since 2012, Neuberger Berman is a signatory of the Principles for Responsible Investment (“PRI”). In our 2019 PRI Assessment, NB Private Equity obtained the highest score, A+, for our overarching approach to ESG strategy and governance, as well as for our ESG integration across each of the four asset classes that Neuberger Berman manages as a firm. Overall, NB Private Equity rated above the peer median in every category, and have made meaningful improvements in our scores over recent years. In addition, Neuberger Berman is a signatory to the U.K. Stewardship Code, Japan Stewardship Code, and the U.S. Investor Stewardship Group, as well as the Global Investor Statement to Governments on Climate Change and the United Nations Global Compact. NB Private Equity works with like-minded institutions to advance the integration of ESG factors across markets, and Neuberger Berman is an active supporter of a range of industry groups including the Sustainability Accounting Standards Board (“SASB”) Alliance as a founding member, US SIF, CDP, Global Impact Investing Network, Impact Management Project as an advisor, Task Force on Climate Related Financial Disclosure (“TCFD”), Transition Pathways Initiative, Ceres, FCLT Global, Council of Institutional Investors, and the World Benchmarking Alliance.

The firm’s ESG Policy provides a broad framework for an approach to ESG integration. This policy is reviewed annually by the ESG Committee, which is responsible for overseeing the ESG integration efforts, setting goals, and reporting on the firm’s performance. This ESG Policy is the guideline for formalising and focusing on responsible investment efforts, with the recognition that environmental, social and governance issues can be an important driver of investment returns. Neuberger Berman measures success through sustained improvement in ESG integration

and building expertise across investment teams and central research capabilities. Over 150 professionals at Neuberger Berman are involved in ESG initiatives as part of their investment responsibilities or as part of working groups and committees.

The firm’s policy statement and ESG annual report are disclosed to the public on the firm’s website [www.nb.com/esg](http://www.nb.com/esg) and includes the latest white papers, articles and perspectives on ESG topics from investment professionals across the firm.

#### ESG Neuberger Berman Private Equity

NB Private Equity believes that integrating ESG considerations throughout our investment process can lead to more consistent and better investment outcomes – by helping to identify both material risks and opportunities to drive value.

NB Private Equity is focused on long-term partnerships and engage with our partners to promote ESG integration best practices and resources.

NB Private Equity leverages the broader firm’s ESG capabilities and resources, but the investment deal teams are responsible for conducting the ESG analysis and the Investment Committee evaluates ESG considerations as a part of their overall investment evaluation. ESG analysis is a part of every fund and direct investment due diligence. During the ownership period, investments are monitored for ESG risks as part of portfolio monitoring and management. Importantly, NB Private Equity engages with our GP partners to share ESG best practices and resources and plays an active leadership role in ESG-related industry collaborations, such as the Principles for Responsible Investing Private Equity Advisory Committee, the Thirty Percent Coalition to encourage diversity and inclusion, and the TCFD to better assess climate-related considerations.

## Equity

It is expected that most of the investments in which the Fund invests will meet the criteria set forth under FASB ASC 820 Fair Value Measurement ("ASC 820") permitting the use of the practical expedient to determine the fair value of the investments. ASC 820 provides that, in valuing alternative investments that do not have quoted market prices, but calculate NAV per share or equivalent, an investor may determine fair value by using the NAV reported to the investor by the underlying investment. To the extent practice expedient is applicable to an investment, the Manager will value the Fund's investment based primarily on the value reported to the Fund by the investment or by the lead investor of a direct co-investment as of each quarter-end, as determined by the investments in accordance with its own valuation policies.

The Fund generally uses the NAV reported by the investments as a primary input in its valuation; however, adjustments to the reported NAV may be made based on various factors, including, but not limited to, the attributes of the interest held, including the rights and obligations, any restrictions or illiquidity on such interest, any potential clawbacks by the investments and the fair value of the investments' investment portfolio or other assets and liabilities. The valuation process for investments categorised in Level 3 of the fair value hierarchy is completed on a quarterly basis and is designed to subject the valuation of Level 3 investments to an appropriate level of consistency, oversight and review. The Manager has responsibility for the valuation process and the preparation of the fair value of investments reported in the financial statements. The Manager performs initial and ongoing investment monitoring and valuation assessments. In determining the fair value of investments, the Manager reviews periodic investor reports and interim and annual audited financial statements received from the investments, reviews material quarter over quarter changes in valuation, and assess the impact of macro market factors on the performance of the investments.

## Debt

Debt investments made on a primary basis are generally carried at cost plus accrued interest, if any. Investments made through the secondary market are generally marked based on market quotations, to the extent available, and the manager will take into account current pricing and liquidity of the security.

For primary issuance debt investments, the Manager estimates the enterprise value of each portfolio company and compares such amount to the total amount of the company's debt as well as the level of debt senior to the Company's interest. Estimates of enterprise value are based on a specific measure (such as EBITDA, free cash flow, net

income, book value or NAV) believed to be most relevant for the given company and compares this metric in relation to comparable company valuations (market trading and transactions) based on the same metric. In determining the enterprise value, the Manager will further consider the companies' acquisition price, credit metrics, historical and projected operational and performance, liquidity as well as industry trends, general economic conditions, scale and competitive advantages along with other factors deemed relevant. Valuation adjustments are made if estimated enterprise value does not support the value of the debt security the Company is invested in and securities senior to the Company's position.

If the principal repayment of debt and any accrued interest is supported by the enterprise value analysis described above, the Manager will next consider current market conditions including pricing quotations for the same security and yields for similar investments.

For investments made on a secondary basis, to the extent market quotations for the security are available, the Manager will take into account current pricing and liquidity. Liquidity may be estimated by the spread between bid and offer prices and other available measures of market liquidity, including number and size of recent trades and liquidity scores. If the Manager believes market yields for similar investments have changed substantially since the pricing of the security, the Manager will perform a discounted cash flow analysis, based on the expected future cash flows of the debt securities and current market rates. The Manager will also consider the maturity of the investment, compliance with covenants and ability to pay cash interest when estimating the fair value of debt investments.

This report contains certain forward-looking statements. Forward-looking statements speak only as of the date of the document in which they are made and relate to expectations, beliefs, projections (including anticipated economic performance and financial condition), future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts and are subject to risks and uncertainties including, but not limited to, statements as to:

- future operating results;
- business prospects and the prospects of the Company's investments;
- the impact of investments the Company expects to make;
- the dependence of future success on the general economy and its impact on the industries in which the Company invests;
- the ability of the investments to achieve their objectives;
- differences between the investment objective and the investment objectives of the private equity funds in which the Company invests;
- the rate at which capital is deployed in private equity investments, co-investments and opportunistic investments;
- expected financings and investments;
- the continuation of the Investment Manager as the service provider and the continued affiliation with the Investment Manager of its key investment professionals;
- the adequacy of the Company's cash resources and working capital; and
- the timing of cash flows, if any, from the operations of the underlying private equity funds and the underlying portfolio companies.

In some cases, forward-looking statements may be identified by terms such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan,"

"potential," "should," "will," and "would," or the negative of those terms or other comparable terminology.

The forward-looking statements are based on the beliefs, assumptions and expectations of the future performance, taking into account all information currently available to the Manager. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to the Manager or are within the Manager's control. If a change occurs, the business, financial condition, liquidity and results of operations may vary materially from those expressed in the forward-looking statements. Factors and events that could cause the business, financial condition, liquidity and results of operations to vary materially include, among other things, general economic conditions, securities market conditions, private equity market conditions, the level and volatility of interest rates and equity prices, competitive conditions, liquidity of global markets, international and regional political conditions, macro-economic factors (including but not limited to war, civil unrest, natural disasters, pandemics, or epidemics) regulatory and legislative developments, monetary and fiscal policy, investor sentiment, availability and cost of capital, technological changes and events, outcome of legal proceedings, changes in currency values, inflation, credit ratings and the size, volume and timing of transactions, as well as other risks described elsewhere in this report and the prospectus relating to the Company's IPO and the Company's prospectus relating to the ZDP Shares.

The foregoing is not a comprehensive list of the risks and uncertainties to which the Company is subject. Except as required by applicable law, the Manager undertakes no obligation to update or revise any forward-looking statements to reflect any change in The Manager's expectations, or any changes in events, conditions or circumstances on which the forward-looking statement is based. In light of these risks, uncertainties and assumptions, the events described by the Company's forward-looking statements might not occur. The Manager qualifies any and all of the forward-looking statements by these cautionary factors.
