ENDNOTES

- 1. The diversification analysis by geography, industry and vintage is based on the fair value of underlying fund investments and direct/co-investments; the diversification analysis for company size is based on the fair value of the underlying direct/co-investments and the fair value of funds with a focus on the company size described. Determinations regarding geography, industry, vintage and company size represent the Investment Manager's estimates. Accordingly, the actual diversification of our investment portfolio and the diversification of our investment portfolio on an ongoing basis may vary from the foregoing information. For the NB Alternatives Direct Co-investment Program and the NB Healthcare Credit Investment Program commitments, total exposure only reflects the funded investments to date. Unfunded amounts and unfunded percentages within each of these programs are excluded from the analysis, as capital deployment is opportunistic and cannot be accurately forecast at this time.
- 2. Guidance regarding NBPE's future portfolio and performance is a target only and not a profit forecast. There can be no assurance that this target will be met or that the Company will make any future distributions whatsoever. Any such changes will be notified to shareholders through a regulatory information service. NBPE's Board of Directors will continue to evaluate the Company's financial position, annual dividend target and the timing of future dividends. Future dividend payments will be announced by NBPE after the Board of Directors have completed such evaluation.
- 3. Yield to maturities represent the return (IRR) from this reporting period to maturity of the investment. Includes a portfolio of small business loans at an interest rate at least at the rate stated above but not included in the yield calculations. The Taylor Precision Products debt notes currently pay 13% cash, but issuer has the option to pay 11% and 2% PIK.
- 4. Actual unfunded commitments are \$255.0 million at 28 February 2018, corresponding to actual over commitment of \$157.0 million and an actual commitment coverage ratio of 38.4%. Unfunded commitments are adjusted for funds past their investment period (except for reserves which may be called) and amounts which NBPE has the right to terminate if it so chooses.
