Global Private Equity Fundraising by Asset Class

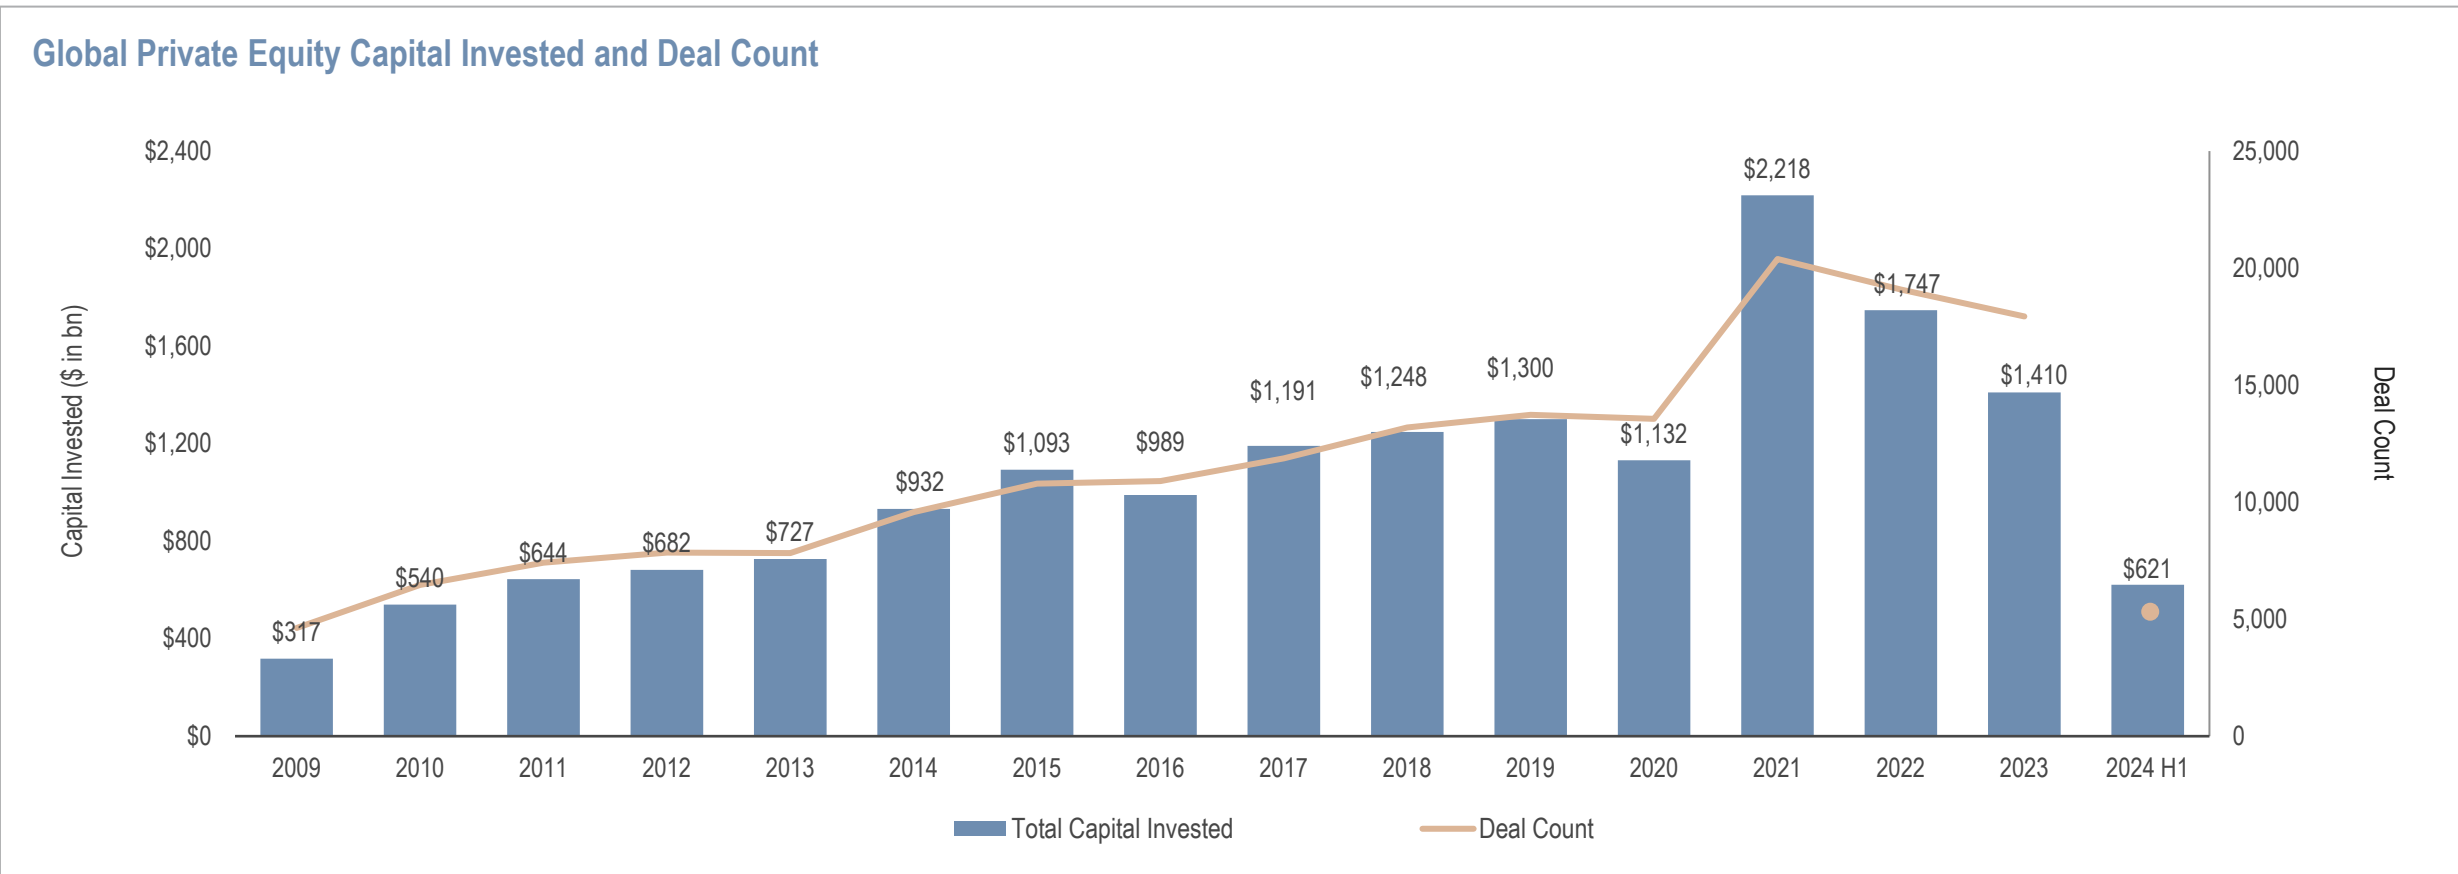

Capital formation in the PE industry has slowed from 2021 record levels, reflecting market conditions, low distributions, and overexposure issues in certain investors' portfolios. The impact has been unevenly distributed amongst managers and asset classes

Source: Preqin as of 2024 Q2.

Global Private Equity Investment Activity

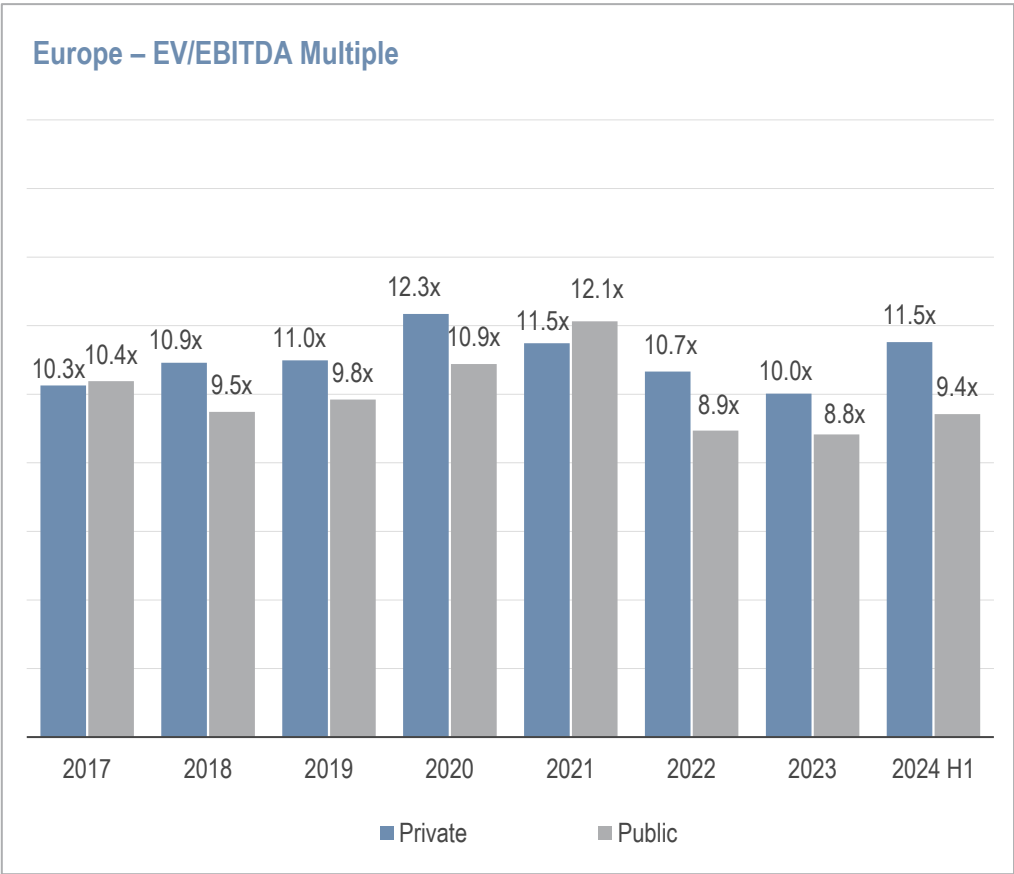

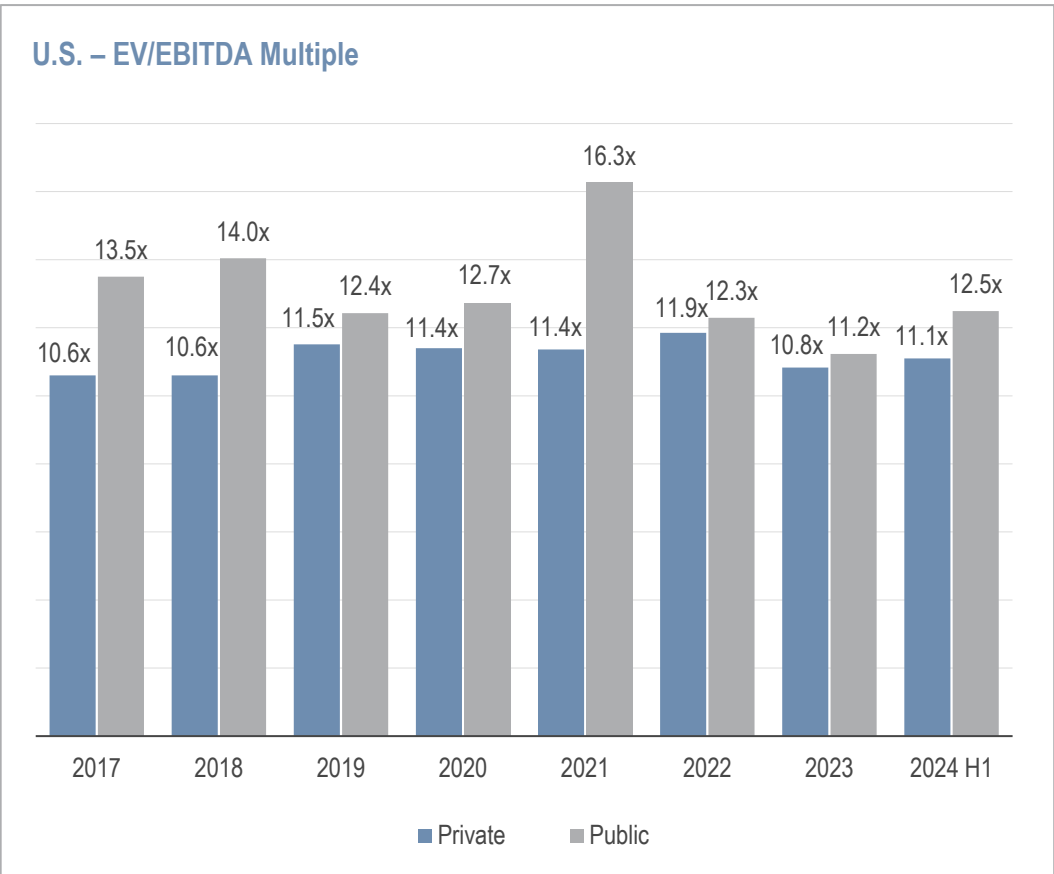

Investment activity has slowed from recent year record levels. Markets became more discernable of quality and processes have been slower and healthier

Source: Pitchbook as of 2024 Q2. Includes buyout, late-stage VC, and growth equity. Includes completed deals only.

U.S. & Europe Valuation Multiples

Private market valuations for new transactions appear to have held fairly steady, as markets have been bifurcated with only a sub-set of high-quality assets trading, and those high-quality assets continuing to trade at full prices. Generally, only a modest price correction observed, but market more discernible of quality

Note: U.S. public multiples are based on the Russell 2000 Index.

Current Debt Market Conditions: Both Private Lenders and Banks Are Active

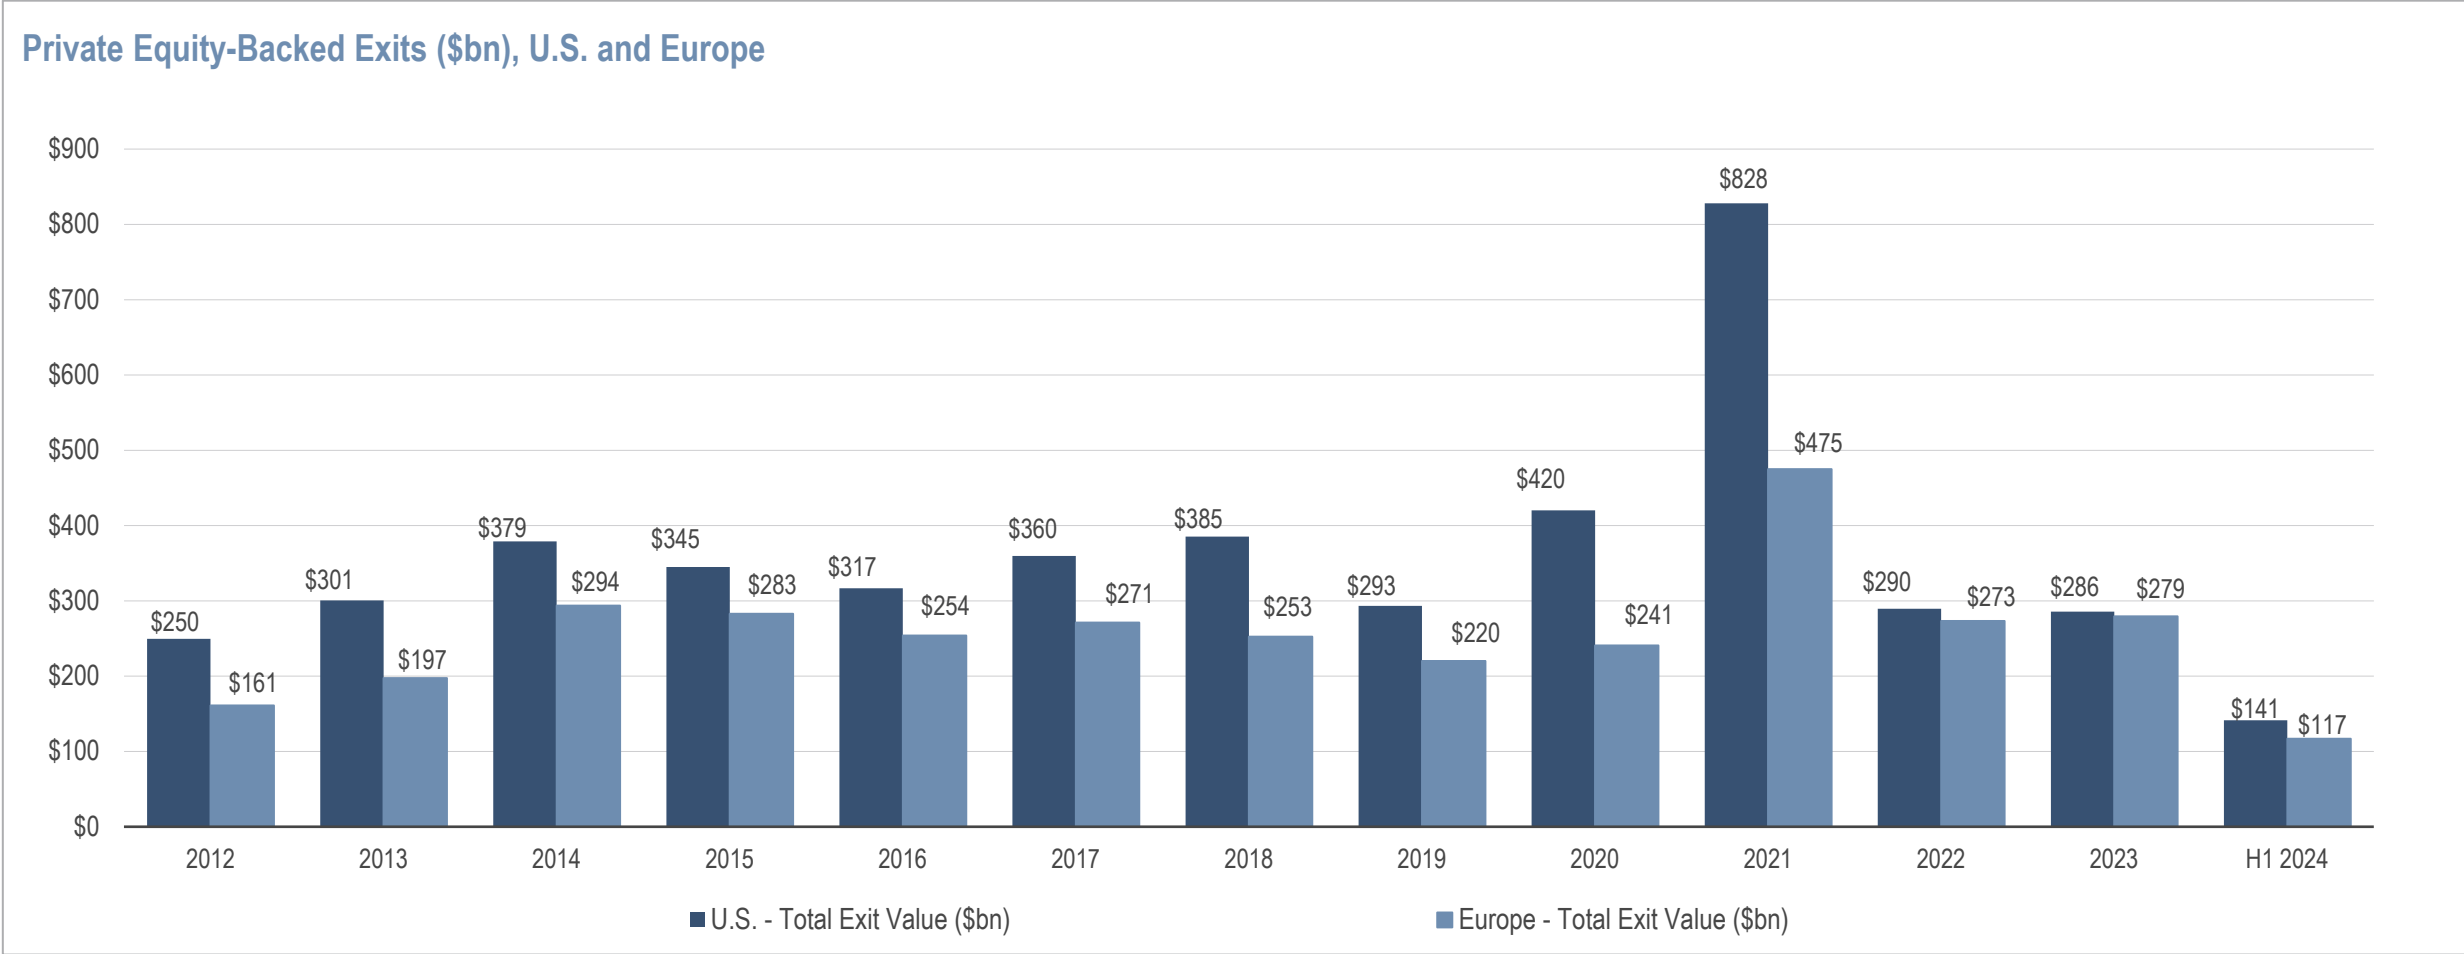

Debt markets are healthy, with strong private lending dry powder and activity and renewed lending appetite from banks

Source: S&P LCD, Preqin. As of Q2 2024, unless mentioned otherwise.

Exit Activity

Following a record exit year in 2021, exit activity slowed in 2022-2023. IPO exit routes were largely closed and follow on activity very limited. Strategics and PE also retrenched. Minority stake sales and GP-led secondaries became more prevalent. Market activity has improved since the beginning of 2024, with improved outlook for near-term exits

Source: Pitchbook, as of 2024 Q2.

Attractive Co-Investment Market Environment

We believe NB Co-Investment is well-positioned to deploy capital in the current market

Increasing Need for Private Equity Financing

- Tighter debt markets; new deals requiring more equity
- Difficulty (and delay) in overall fundraising for private equity firms
- GPs less willing to rely on post-deal syndications
- Platforms that make meaningful primary commitments continue to have priority

Increasing Co-Investment Deal Flow

- Less experienced co-investors stepped back in volatile environment
- Certain co-investors became capital constrained and/or impacted by valuation volatility
- NB Private Markets co-investment deal flow increased to ~11 deals per week in 2023 and YTD 2024 (versus ~8 deals per week over the prior three calendar years)¹
- Ability to allocate tactically

Strong Environment For Mid-Life Opportunities

- Exit options have been more limited in recent years: IPOs nearly frozen, SPACs not available, corporate strategics and PE investors pulled back
- Minority sale allows GPs to maintain existing attractive debt capital structure
- Attractive time for potential add-on acquisitions

The data is subject to the following adjustments: 1) Excludes public companies and Marquee Brands. 2) Analysis based on 58 private companies. 3) The private companies included in the data represent approximately 83% of the total direct equity portfolio by NAV. 4) The following exclusions to the data were made: a) EBITDA growth of one company (approximately 2% of value) was excluded from the data as the Manager believed the EBITDA growth rate was an outlier due to an extraordinary high percentage change b) one company (<1% of direct equity fair value) was excluded due to noncomparable periods of revenue and/or EBITDA c) five companies (5% of direct equity fair value) were held less than one year and excluded from the portfolio company operating metrics data due to noncomparable periods of revenue and/or EBITDA prior to private equity ownership. Where necessary, estimates were used, which include pro forma adjusted EBITDA and other EBITDA adjustments, pro forma revenue adjustments, run-rate adjustments for acquisitions, and annualised quarterly operating metrics. Portfolio company operating metrics are based on the most recently available (unaudited) financial information for each company and are as reported by the lead private equity sponsor to the Manager as of 23 September 2024, with LTM periods as of 30/6/24 and 31/3/24 and 30/6/23 and 31/3/23. LTM revenue and LTM EBITDA growth rates are weighted by fair value. Growth rate data is based on 58 companies where NB could calculate a growth rate and subject to the aforementioned exclusions; underlying EBITDA reported by the GPs may include pro forma or other adjustments to LTM EBITDA in one or both periods and this reported EBITDA used to calculate growth rates may not be the same EBITDA for valuation purposes by underlying GPs. As a result, growth and valuation multiple data are not directly comparable.

Private Company Valuation & Leverage

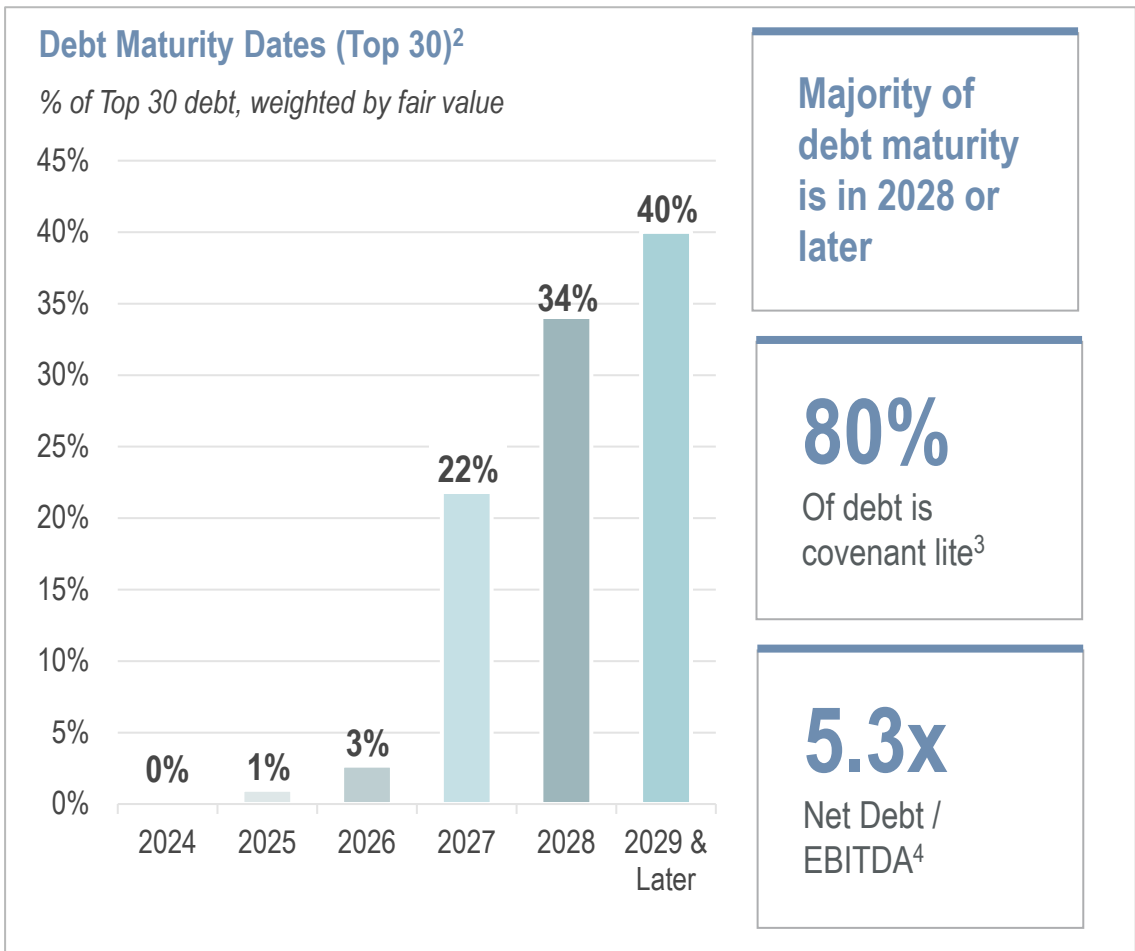

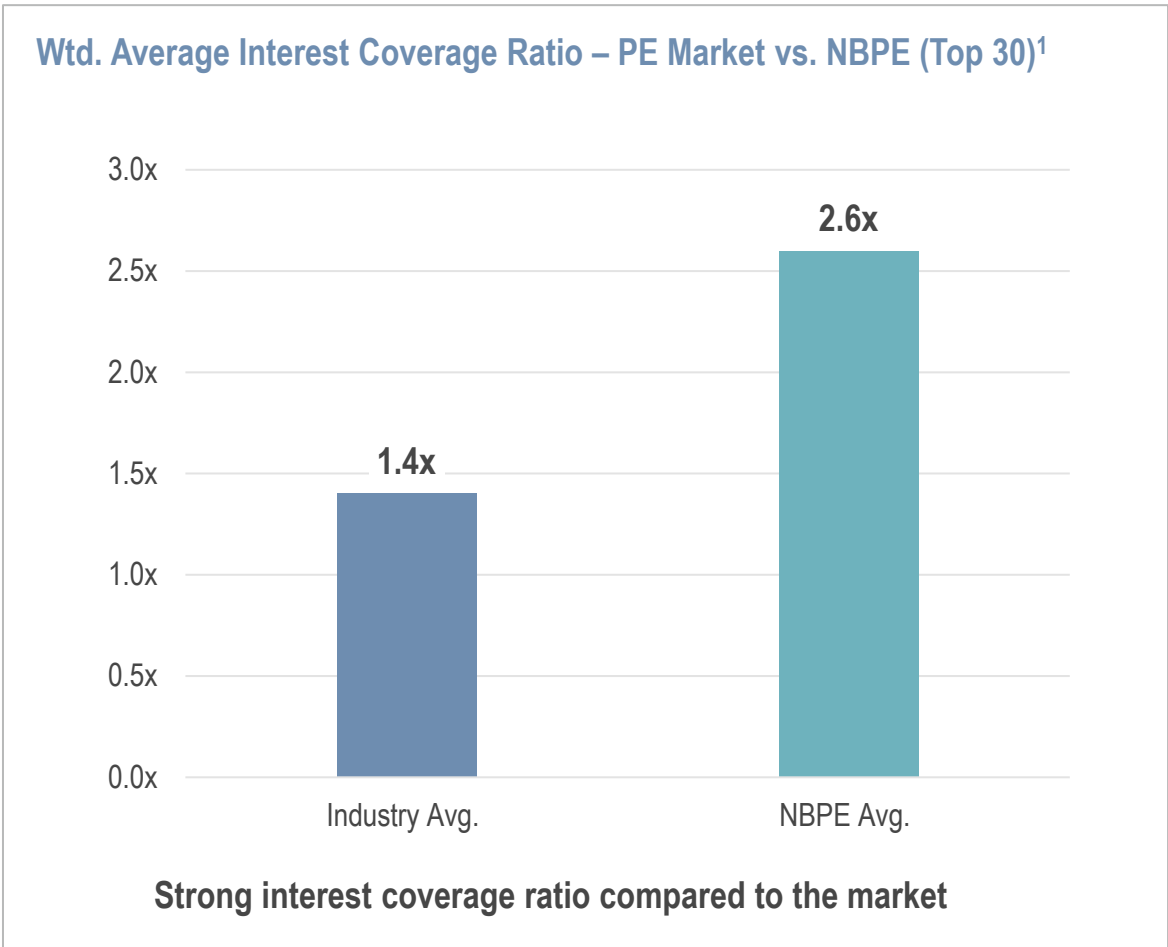

The portfolio’s weighted average EV/EBITDA and leverage multiples increased slightly from December 2023

Note: As of 30 June 2024. Past performance is no guarantee of future results. Fair value as of 30 June 2024 and subject to the following adjustments. 1) Excludes public companies, Marquee Brands and other investments not valued on a multiple of EBITDA. 2) Based on 57 private companies which are valued based on EV/EBITDA metrics. 3) The private companies included in the data represents 80% of direct equity investment fair value. 4) Companies not valued on multiples of EBITDA (billings, revenue or other valuation metrics) are excluded from valuation statistics. 5) Leverage statistics exclude companies with net cash position and leverage data represents 80% of direct equity investment fair value. Portfolio company operating metrics are based on the most recently available (unaudited) financial information for each company and are as reported by the lead private equity sponsor to the Manager as of 23 September 2024, based on reporting periods as of 30 June 2024 and 31 March 2024. EV and leverage data is weighted by fair value. LTM EBITDA used by underlying GPs for valuation purposes may differ from EBITDA used to calculate growth rates due to pro forma or other adjustments and therefore the two data sets are not directly comparable

Appendix – *UN Sustainable Development Goals (UN SDGs) Thematic Alignment of Investments*

UN Sustainable Development Goals (UN SDGs) Thematic Alignment of Investments. The Manager acknowledges that companies may have a range of effects on employees, the community and the environment through their operations and products and services. The Manager believes that companies that exhibit leadership in managing material environmental, social, and governance considerations, are also often more resilient, competitively positioned, and may have lower risk profiles. Furthermore, the Manager believes that companies which can be considered as thematically aligned with addressing social and environmental challenges are by their nature, essential and that these business models may benefit from macroeconomic and demographic trends while also contributing meaningfully to addressing global social and environmental challenges, such as outlined by the United Nations Sustainable Development Goals (“UN SDGs”).

The Manager evaluates UN SDGs Thematic Alignment as follows:

- No potential UN SDGs thematic alignment: Companies whose operations or products/services may potentially conflict with the advancement of positive outcomes for people or the environment, such as outlined by the themes of the UN SDGs;
- Neutral potential UN SDGs thematic alignment: Companies that have a mixed or unknown benefit to people or the environment, such as outlined by the themes of the UN SDGs;
- Potential moderate UN SDGs thematic alignment: Companies that have an overall positive benefit to people or the environment, such as outlined by the themes of the UN SDGs;
- Potential high UN SDGs thematic alignment: Companies whose products or services offer solutions to long-term social and environmental challenges such as those outlined by the UN SDGs in addition to additional social or environmental dimensions as defined by the Impact Management Project.

The Manager strives to identify and invest in companies that it deems to have thematic alignment with the UN SDGs, where deemed financially beneficial to do so, while seeking to avoid exposure to companies that have known ESG-related controversies or business models it deems have no potential UN SDGs thematic alignment or that are otherwise inconsistent with the Manager's Responsible Investment Policy, as the Manager believes such exposure would otherwise present material risks to the future value of an investment.

Awards Disclosures

European Pensions, a leading publication for pension funds across Europe, launched these awards to give recognition to and honor the investment firms, consultancies and pension providers across Europe that have set the professional standards in order to best service European pension funds over the past year. Judging is undertaken by a group of judges with expertise across the European pension fund space. Each judge reviews submitted entry material and then scores the entries out of a total of score of 10 providing their reasoning as to why they have submitted that score. Two judges analyze each category and the firm with the highest overall score wins that category. Votes are verified by the European Pensions' editorial team. The award does not constitute an investment recommendation. NB Private Equity did not pay a fee to participate. Awards and ratings referenced do not reflect the experiences of any Neuberger Berman client and readers should not view such information as representative of any particular client's experience or assume that they will have a similar investment experience as any previous or existing client. Awards and ratings are not indicative of the past or future performance of any Neuberger Berman product or service.

Private Equity Wire, a specialist industry publication in Europe launched these awards to showcase excellence among industry participants. The publication partnered with Bloomberg to create a clearly defined methodology for selecting the award winners. Shortlists were created by Bloomberg from a fund manager universe including all funds managed by European-domiciled GPs with a minimum fund size of \$100 million. Asset band grouping thresholds were based on individual fund sizes – not overall GP assets under management in a category. Funds were grouped according to category and vintages from 2013 to 2018 and ranked on the basis of their net IRR. GPs with more than one fund ranked among the top performers across multiple vintages within any category were shortlisted. Winners from each category were then decided by majority vote from the publication's readers. The award does not constitute an investment recommendation. With 1,513 constituents as of 30 September 2024, the index covers approximately 85% of the free float-adjusted market capitalisation in each country (MSCI World Factsheet, 30 September 2024, the latest available). The benchmark performance is presented for illustrative purposes only to show general trends in the market for the relevant periods shown. The investment objectives and strategies in the benchmark may be different than the investment objectives and strategies of NBPE and may have different risk and reward profiles. A variety of factors may cause this comparison to be an inaccurate benchmark for any particular fund and the benchmarks do not necessarily represent the actual investment strategy of a fund. It should not be assumed that any correlations to the benchmark based on historical returns would persist in the future. Indexes are unmanaged and are not available for direct investment. Investing entails risks, including possible loss of principal. Past performance is no guarantee of future results.
4. Valuation & Leverage: Past performance is no guarantee of future results. Fair value as of 30 June 2024 and subject to the following adjustments. 1) Excludes public companies, Marquee Brands and other investments not valued on a multiple of EBITDA. 2) Based on 57 private companies which are valued based on EV/EBITDA metrics. 3) The private companies included in the data represents 80% of direct equity investment fair value. 4) Companies not valued on multiples of EBITDA (billings, revenue or other valuation metrics) are excluded from valuation statistics. 5) Leverage statistics exclude companies with net cash position and leverage data represents 80% of direct equity investment fair value. Portfolio company operating metrics are based on the most recently available (unaudited) financial information for each company and are as reported by the lead private equity sponsor to the Manager as of 23 September 2024, based on reporting periods as of 30 June 2024 and 31 March 2024. 5. Revenue & EBITDA Growth: Past performance is no guarantee of future results. Fair value as of 30 June 2024. Growth rate data includes both organic growth and growth from M&A transactions in the portfolio. The data is subject to the following adjustments: 1) Excludes public companies and Marquee Brands. 2) Analysis based on 58 private companies. 3) The private companies included in the data represent approximately 83% of the total direct equity portfolio by NAV. 4) The following exclusions to the data were made: a) EBITDA growth of one company (approximately 2% of value) was excluded from the data as the Manager believed the EBITDA growth rate was an outlier due to an extraordinary high percentage change b) one company (<1% of direct equity fair value) was excluded due to noncomparable periods of revenue and/or EBITDA c) five companies (5% of direct equity fair value) were held less than one year and excluded from the portfolio company operating metrics data due to noncomparable periods of revenue and/or EBITDA prior to private equity ownership. Where necessary, estimates were used, which include pro forma adjusted EBITDA and other EBITDA adjustments, pro forma revenue adjustments, run-rate adjustments for acquisitions, and annualised quarterly operating metrics. Portfolio company operating metrics are based on the most recently available (unaudited) financial information for each company and are as reported by the lead private equity sponsor to the Manager as of 23 September 2024, with LTM periods as of 30/6/24 and 31/3/24 and 30/6/23 and 31/3/23. Important Performance Information Endnotes – Co-Investments

Note: Past performance is not necessarily indicative of future results. Performance includes data since April 1, 2009 – September 30, 2024. NB Alternatives Advisers LLC (“NBAA”, “Investment Manager” or “Adviser”) is the investment manager for Neuberger Berman’s private equity practice (“NB Private Equity”). Track record reflects includes private equity investments (“Private Equity Investments”) made in funds managed by the Private Investment Portfolios and Co-Investment Investment Committee (“PIPCO Funds”). “Private Equity Investments” excludes (i) credit- or debt-like investments that were structured with an expected return profile similar to a debt security and (ii) real assets investments including energy, real estate, power utilities and infrastructure that were not expected to have a private equity-like return profile at the time it was underwritten. The PIPCO track record includes accounts for which investments are sourced and due diligenced by NB Private Markets and the investor may exercise final investment discretion. A full schedule of investments is available upon request. PIPCO Funds includes funds managed by NB Alternatives and its predecessors-in-interest. Neuberger Berman and its affiliates are the successor to all of the predecessors’ operational assets, and employ substantially all of their key personnel, and NB Alternatives became either the advisor or sub-advisor to the fund accounts previously advised by the predecessors. Gross data is net of underlying investment fees, expenses, and carried interest but gross of NB fees, expenses, and carried interest and net data is net of underlying investment fees, expenses, and carried interest and net of NB fees, expenses, and carried interest. Please note that most custom account funds generally do not use credit facilities. Returns are unaudited. In reviewing the performance information, please keep in mind the inherent limitations of the reliability of certain of the valuations upon which that performance presentation is made. The results are provided for hypothetical and illustrative purposes only, are subject to a number of significant assumptions and are not intended to predict the performance of any specific investment. Similarly, there can be no assurance that future investments within the strategy will achieve, or be able to achieve, comparable results. No representation or warranty is made as to the reasonableness of the assumptions made or that all assumptions used in achieving the returns have been stated or fully considered. A full Schedule of Investments is available upon request.

The composite performance reflects the combined performance of all Private Equity co-investments made by the PIPCO Funds and does not reflect the actual performance of any individual investor, or account managed or advised by Neuberger Berman and is therefore deemed to be hypothetical and for illustrative purposes only, is subject to a number of significant assumptions (as described below) and is not intended to predict the future performance of any Neuberger Berman fund or any specific investment. This hypothetical performance was not made in the context of a single fund as part of a single investment program with coordinated investment objectives, guidelines and restrictions. Accordingly, it should not be assumed that the investments made by any such fund will have the same characteristics or returns as presented herein. Hypothetical returns have inherent limitations, and prospective investors should not rely on any hypothetical performance shown herein. Similarly, there can be no assurance that any Neuberger fund will achieve, or be able to achieve, comparable results. No representation or warranty is made as to the reasonableness of the assumptions made or that all assumptions used in achieving the returns have been stated or fully considered. Changes in the assumptions would likely have a material impact on the hypothetical returns.

Composite Net Return Calculation Methodology: The information provided herein includes all co-investments originated by and completed in the NB Private Equity platform managed by the PIPCO Investment Committee during Q2 2009 – Q1 2024 with exceptions as outlined above. As governing documents and applicable fee structures differ for each commingled fund and dedicated client account, it is not feasible to appropriately allocate fees, expenses and carried interest in a perfectly consistent manner and obtain an accurate aggregate net return from the actual returns presented on a “gross basis”. Notwithstanding the above, we have conducted an analysis, presented herein, with the goal of simulating “synthetic net returns” based on certain assumptions applied across actual gross cash flows, as detailed below.

The Composite Net Return data is calculated by modeling the effect of layering in the fees, expenses and carried interest of NB Alternatives Advisers LLC in the manner described below over the investment valuations. In determining the fair value of the investments, NB Alternatives Advisers LLC applies the guidance of ASC 820 (formerly known as Financial Accounting Standard 157), which requires investments to be reported at fair value. Each vintage year is a “Fund” with the fund size (“total commitments”) being total invested capital for that vintage year as of 9/30/2024. Fees are charged as follows (i) 125 bps on total commitments for the first four years of the fund life; and (ii) 125 bps on net invested capital (“cost basis”) for the remainder of the fund life. The cost basis is estimated by reducing the cumulative invested capital by cumulative distributions to date, scaled by the investments’ 9/30/2024 multiple of invested capital, or the investment’s final multiple of invested capital. For example, a \$20 million investment that has returned \$15 million and has a remaining \$15 million in value (1.5x total multiple) will be held at a cost basis of: $\$20 - \$15 * (\$20 / \$30) = \$10$ million. Carry is accrued on a deal-by-deal basis, assuming a 12.5% carried interest, subject to an 8% preferred return including a 100% GP Catch-up. The Net IRR is calculated based on the timing of actual investment cash flows and, as such, Net performance is not impacted by the use of a subscription facility. Expenses of 20 bps are charged on committed capital for the assumed life of the fund. Any performance or related information presented has not been adjusted to reflect the impact of any additional fees paid to a placement agent by an investor, if any, or any reduced fee rates applicable to certain investors with aggregate commitments equal to or greater than \$10 million, which would result in a substantial reduction or increase, as applicable, in the returns if such fees or reduced fee rates were incorporated. A composite net return calculation is used in lieu of actual net returns given that actual net returns are impossible to calculate because fees and expenses are applied on a fund-wide basis and the investments in this composite calculation were made through different fund vehicles using different rates.

Realised and partially Realised investments are defined as investments with no remaining NAV or a DPI larger than 100% (DPI = distributed capital / paid-in capital). The Composite Realised Net IRR is calculated using the same terms and methodology noted above with each “Fund” consisting of Realised investments within that vintage year. The fund size (“total commitments”) is defined as total invested capital for that vintage year.

Returns may increase or decrease as a result of currency fluctuations.

To facilitate compliance with Rule 206(4)-1 under the Investment Advisers Act of 1940, as amended (commonly known as the SEC Marketing Rule), as well as the FAQ guidance from the SEC issued on January 11, 2023, commingled or custom funds that made their first investment prior to April 1, 2009 are excluded from fund level track records and investments which were approved by the Investment Committee prior to April 1, 2009 are excluded from investment level track records. These funds / investments are excluded due to a greater than 50% change in investment committee composition after the acquisition of client account investments by NB Alternatives Advisers LLC (“NBAA”) on March 31, 2009, from its former parent. NBAA’s investment committee composition thereafter has been comprised almost entirely of NB Private Markets investment professionals (as opposed to senior management of its former parent). Track records prior to April 1, 2009 may be provided upon written request.

Market Conditions. The Fund’s strategy is based, in part, upon the premise that investments will be available for purchase by the Fund at prices that the Fund, the general partner of the Fund (the “General Partner”) or NB Alternatives Advisers LLC (the “Adviser”) considers favorable and which are commensurate with the targeted returns described herein. To the extent that current market conditions change or change more quickly than Neuberger Berman Group, LLC or an affiliate (collectively, “Neuberger Berman”) currently anticipates, investment opportunities may cease to be available to the Fund or investment opportunities that allow for the targeted returns described herein may no longer be available.

No Assurance of Investment Return. There can be no assurance or guarantee that the Fund’s objectives will be achieved, that the past, targeted or estimated results presented herein will be achieved, or that investors in the Fund (“Investors”) will receive any return on their investments in the Fund. The Fund’s performance may be volatile. An investment should only be considered by persons who can afford a loss of their entire investment. Past activities of investment entities sponsored by Neuberger Berman provide no assurance or guarantee of future results. The Fund’s intended strategy relies, in part, upon the continuation of existing market conditions in certain countries (including, for example, supply and demand characteristics or continued growth in GDP) or, in some circumstances, upon more favorable market conditions existing prior to the termination of the Fund. No assurance or guarantee can be given that investments meeting the Fund’s investment objectives can be acquired or disposed of at favorable prices or that the market for such investments (or market conditions generally) will either remain stable or, as applicable, recover or improve, since this will depend upon events and factors outside the control of the Fund’s investment team. Notwithstanding anything in this presentation to the contrary, Neuberger Berman, the Adviser or the General Partner may vary its investment processes and/or execution from what is described herein. The returns shown herein include returns generated by reinvested cash capital or profits. Without such reinvestment, the returns shown in this presentation will have been lower.

Legal, Tax and Regulatory Risks. Legal, tax and regulatory changes (including changing enforcement priorities, changing interpretations of legal and regulatory precedents or varying applications of laws and regulations to particular facts and circumstances) could occur during the term of the Fund that may adversely affect the Fund or its partners.

Default or Excuse. If an Investor defaults on or is excused from its obligation to contribute capital to the Fund, other Investors may be required to make additional contributions to the Fund to replace such shortfall. In addition, an Investor may experience significant economic consequences should it fail to make required capital contributions.

Indemnification. Under certain circumstances, the Fund is responsible for indemnifying the Adviser, the General Partner and their respective affiliates for losses or damages.

Leverage. The Fund’s investments are expected to include underlying portfolio companies whose capital structures may have significant leverage. These companies may be subject to restrictive financial and operating covenants. The leverage may impair these companies’ ability to finance their future operations and capital needs. The leveraged capital structure of such investments will increase the exposure of the portfolio companies to adverse economic factors such as rising interest rates, downturns in the economy or deteriorations in the condition of the portfolio company or its industry.

Use of Leverage. The General Partner will have the right to cause the Fund to borrow money in order to, among other things, make Fund Investments and pay Fund expenses in lieu of funding such amounts by calling capital contributions from the Investors. In addition, the Fund may borrow funds for the purpose of making distributions to Investors, generally in anticipation of amounts to be received by the Fund from Fund Investments. Using borrowings to delay calling capital contributions or to accelerate distributions will generally be utilised by the General Partner to increase the Investors’ rate of return on their interests in the Fund or in some cases to normalise distributions. In the event that the Fund has aggregate losses, the Investors may receive a lower return on investment than they would have received had no borrowings been utilised.

Summary Risk Factors (continued)

Impact of Outstanding Borrowings on Investor Returns. In the event that a Fund uses a credit facility, it is expected that interest will accrue on any outstanding borrowings at a rate lower than the Fund's preferred return, which does not accrue on such borrowings and will begin accruing when capital contributions to fund such Investments, or repay borrowings used to fund such Investments, are actually advanced by Investors to the Fund. As a result, the use of a credit facility with respect to Investments and ongoing capital needs may reduce or eliminate the preferred return received by the Investors and accelerate or increase distributions of carried interest to the General Partner.

Highly Competitive Market for Investment Opportunities. The activity of identifying, completing and Realising attractive investments is highly competitive, and involves a high degree of uncertainty. There can be no assurance or guarantee that the Fund will be able to locate, consummate and exit investments that satisfy the Fund's rate of return objectives or Realise upon their values or that it will be able to invest fully its committed capital.

Reliance on Key Management Personnel. The success of the Fund will depend, in large part, upon the skill and expertise of certain Neuberger Berman professionals. In the event of the death, disability or departure of any key Neuberger Berman professionals, the business and the performance of the Fund may be adversely affected.

Potential Conflicts of Interest. There may be occasions when the Adviser, the General Partner and/or advisors to the Fund and their affiliates will encounter potential conflicts of interest in connection with the Fund's activities including, without limitation, the activities of Neuberger Berman and key personnel, the allocation of investment opportunities, conflicting fiduciary duties and the diverse interests of the Fund's limited partner group. There may be disposition opportunities that the Fund cannot take advantage of because of such conflicts.

Limited Liquidity. There is no organised secondary market for Investors' interests in the Fund, and none is expected to develop. There are restrictions on withdrawal and transfer of interests in the Fund.

Material, Non-Public Information. By reason of their responsibilities in connection with other activities of Neuberger Berman, certain employees of the Adviser, the General Partner, the advisors and their respective affiliates may acquire confidential or material non-public information or be restricted from initiating transactions in certain securities. The Fund will not be free to act upon any such information. Due to these restrictions, the Fund may not be able to initiate a transaction that it otherwise might have initiated and may not be able to sell an investment that it otherwise might have sold.

Epidemics, Pandemics, Outbreaks of Disease and Public Health Issues. Neuberger Berman's business activities as well as the activities of the Fund and its operations and investments could be materially adversely affected by outbreaks of disease, epidemics and public health issues in Asia, Europe, North America, the Middle East and/or globally, such as COVID-19 (and other novel coronaviruses), Ebola, H1N1 flu, H7N9 flu, H5N1 flu, Severe Acute Respiratory Syndrome, or SARS, or other epidemics, pandemics, outbreaks of disease or public health issues. In particular, coronavirus, or COVID-19, has spread and is currently spreading rapidly around the world since its initial emergence in December 2019 and has negatively affected (and may continue to negative affect or materially impact) the global economy, global equity markets and supply chains (including as a result of quarantines and other government-directed or mandated measures or actions to stop the spread of outbreaks). Although the long-term effects of coronavirus, or COVID-19 (and the actions and measures taken by governments around the world to halt the spread of such virus), cannot currently be predicted, previous occurrences of other epidemics, pandemics and outbreaks of disease, such as H5N1, H1N1 and the Spanish flu, had material adverse effects on the economies, equity markets and operations of those countries and jurisdictions in which they were most prevalent. A recurrence of an outbreak of any kind of epidemic, communicable disease, virus or major public health issue could cause a slowdown in the levels of economic activity generally (or push the world or local economies into recession), which would be reasonably likely to adversely affect the business, financial condition and operations of Neuberger Berman and the Fund. Should these or other major public health issues, including pandemics, arise or spread farther (or continue to worsen), Neuberger Berman and the Fund could be adversely affected by more stringent travel restrictions (such as mandatory quarantines and social distancing), additional limitations on Neuberger Berman's (or the Fund's) operations and business activities and governmental actions limiting the movement of people and goods between regions and other activities or operations.

Valuation Risk. Due to the illiquid nature of many Fund investments, any approximation of their value will be based on a good-faith determination as to the fair value of those investments. There can be no assurance that these values will equal or approximate the price at which such investments may be sold or otherwise liquidated or disposed of. In particular, the impact of the recent Covid-19 pandemic is likely to lead to adverse impacts on valuations and other financial analyses for current and future periods.
